HOW DID YOU HEAR ABOUT THIS COURSE?

7 Hours of Continuing Education

Before March 15, 2016
Dentist: $245
Auxiliary: $210

After March 15, 2016
Dentist: $325
Auxiliary: $280

Fees include course material, continental breakfast, and refreshments during breaks.

Refunds are granted only if a written cancellation notification is received at least 14 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 7 days before this course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

FUNDAMENTAL PRINCIPLES OF RESTORATIVE IMPLANT DENTISTRY FOR THE SINGLE MISSING TOOTH
Part I - Lecture Only: Friday, January 15, 2016
Part II - Hands-On: Saturday, January 16, 2016

ORAL SURGERY FOR THE GENERAL PRACTITIONER
Saturday, January 23, 2016

THE 41TH ANNUAL USC INTERNATIONAL PERIODONTAL AND IMPLANT SYMPOSIUM
General Sessions: Friday - Saturday, January 29 - 30, 2016
Dental Hygiene Forum: Saturday, January 30, 2016
Dental Hygiene Hands-On: Saturday, January 30, 2016
Discussion Workshop (Digital Smile Design): Saturday, January 30, 2016
Hands-On Workshop (Regenerative Therapy): Saturday, January 30, 2016

PORCELAIN VENEERS: OPTIMIZING RESULTS USING SUPRA-GINGIVAL PRINCIPLES, AND UNDERSTANDING ADHESION AND OCCLUSION
Friday, February 5, 2016

IMPLANT CPR! SUCCESSFUL MANAGEMENT OF PROSTHETIC IMPLANT COMPLICATIONS
Module I - Lecture: Friday, February 5, 2016
Module II - Hands-On: Saturday, February 6, 2016

EMERGING DISEASES, INFECTION CONTROL AND CALIFORNIA DENTAL PRACTICE ACT
Saturday, February 6, 2016

CHRONIC OROFACIAL, ORODENTAL AND HEADACHE PAINS FOR THE DENTIST - WEBINAR AVAILABLE
Friday - Saturday, February 19 - 20, 2016

MASTERING MOLAR ENDODONTICS
Friday - Saturday, February 26 - 27, 2016

3 + 1 Free CE Program
The More You Learn, The More You Earn!

Take any 3 CE courses between January and December 2016 and receive another course for FREE. Visit http://uscdentalce.org for terms & details.

Life-Long Tradition and Excellence
This comprehensive course is intended to provide clinicians a practical and logical approach to recognizing, diagnosing and treating various oral and maxillofacial diseases. Predominantly a case-based approach by expert faculty, this course would be particularly useful for general dentists, specialists, dental hygienists and assistants, in addition to medical health care professionals involved in the clinical care of patients with head and neck considerations. This course provides a great opportunity to brush up your diagnostic skills, gain insight into modern management techniques and principles, or acquire new areas of expertise that can be applied to your clinical practice. The course will also address possible legal ramifications from failing to diagnose pathology, such as cancer.

The course reviews principles of both soft and hard tissue lesion identification and management, and covers common odontogenic infections, cysts and tumors, in addition to non-odontogenic conditions such as mucosal and submucosal pathology, skin lesions of the face, salivary gland diseases, and conditions affecting the jaw bones and temporomandibular joint (TMJ). Cases will be drawn from expert faculty and include clinical images and conventional and advanced imaging studies, such as computerized tomography and TMJ tomography. Concepts of clinical and radiographic recognition of benign versus malignant tumors will be addressed. Faculty will also discuss diagnostic principles and techniques and their potential applications.

**Synopsis**

- **Identification and differential diagnosis of various odontogenic infections, cysts and tumors both clinically and through conventional and advanced CT imaging studies**
- **Recognition of non-odontogenic lesions and their differentiation from odontogenic lesions both clinically and through radiographic studies. This includes benign and malignant neoplasms of bone and other hard tissues of the craniofacial region**
- **Identification of salivary gland pathoses, diagnostic workup of the major and minor salivary glands, and interpretation of test results from salivary gland analysis**
- **Diagnosis and treatment of facial muscle and TMJ disorders, atypical odontalgia, phantom tooth pain, attrition, erosion, and abrasion**
- **Evaluation of the facial skin for dermatoglyphics and skin lesions during a head and neck examination, and an introduction to common skin lesions, particularly cancers affecting the skin of the face.**

**Topics to be covered:**

- **Identification and differential diagnosis of various odontogenic infections, cysts and tumors both clinically and through conventional and advanced CT imaging studies**
- **Recognition of non-odontogenic lesions and their differentiation from odontogenic lesions both clinically and through radiographic studies. This includes benign and malignant neoplasms of bone and other hard tissues of the craniofacial region**
- **Identification of salivary gland pathoses, diagnostic workup of the major and minor salivary glands, and interpretation of test results from salivary gland analysis**
- **Diagnosis and treatment of facial muscle and TMJ disorders, atypical odontalgia, phantom tooth pain, attrition, erosion, and abrasion**
- **Evaluation of the facial skin for dermatoglyphics and skin lesions during a head and neck examination, and an introduction to common skin lesions, particularly cancers affecting the skin of the face.**

**Upon completion of this course participants should:**

- Know how to identify and diagnose oral soft and hard tissue diseases
- Become familiar with principles of differential diagnosis and techniques for definitive diagnosis
- Be able to apply adjunct diagnostic methods for lesion evaluation
- Know how to diagnose pathology affecting the craniofacial and jaw bones
- Understand the role of conventional and advanced imaging studies in hard tissue pathology
- Know how to make radiographic evaluation and interpretation of osseous lesions
- Be able to identify odontogenic infections, cysts and tumors in the jaws
- Know how to differentiate between odontogenic and non-odontogenic lesions
- Recognize the primary and metastatic cancers affecting the craniofacial and jaw bones
- Recognize and evaluate salivary gland disease
- Become familiar with skin pathology affecting the face
- Know the concepts of treatment and management of soft and hard tissue diseases
