3 + 1 Free CE Program

The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2015 and receive another course for FREE.
The number of claims related to implant complications has increased significantly over the last few years. In addition, complications associated with implant surgery can have a devastating effect on the final outcome of treatment. This lecture course will focus on how to identify and avoid potential complications before they arise and how to manage many of the common complications that can occur with implant therapy. Emphasis will be given to medico-legal implications, patient risk assessment, classifications of complications, and proper treatment planning principles. At the end of this course, participants will have a better understanding of the prevention and management of complications related to implant therapy.

**Upon completion of this course participants should be able to:**

- Perform treatment plan effectively to minimize the incidence of future complications
- Perform pre-operative risk assessment
- Manage the most common implant related complications
- Avoid and manage prosthetic complications
- Avoid esthetic complications
- Assess the role implant position plays in restorative complications
- Avoid and minimize risks associated with implant surgery
- Manage complications associated with bone graft procedures and sinus augmentation (graft infection and failure, sinusitis, oral-antral communication, and sinus fistula)
- Manage peri-implantitis
- Manage nerve injury associated with implant surgery
- Manage failed implants and remove implants with minimal bone trauma
- Assess medico-legal implications of treatment failures
- Discuss recent case settlement and outcomes

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
