ENDODONTICS FROM A TO Z:
A HANDS-ON WORKSHOP FOR THE GENERAL PRACTITIONER

USC School of Dentistry
Friday - Sunday, 9:00 a.m. - 5:00 p.m.
June 8 - 10, 2007 (Part I)
June 22 - 24, 2007 (Part II)
Endodontics has gone through many exciting changes in the past several years. Recent advances in technology, materials and equipment have changed the way endodontics is practiced today. These advances have made it possible to efficiently perform successful endodontic treatment with improved precision, predictable results, and with much greater patient acceptance. This comprehensive state-of-the-art course includes seminars and hands-on workshops specially designed for General Dentists who wish to advance their knowledge and clinical skills in the art and science of endodontics. A team of endodontic specialists from USC School of Dentistry will thoroughly discuss evidence-based clinical and biological concepts of modern endodontic therapy. These experts will walk you, from start to finish, through all the necessary steps and phases that will enable you to enhance the way you practice endodontics so you can provide the best standards of endodontic care to your patients.

During the hands-on part of this course you will have the opportunity to apply the principles discussed by the USC team of experts and practice in our famous “Sim-Lab”, one of the most modern and realistic simulator facilities in California. You will perform endodontic treatment from start to finish in both single-rooted and multi-rooted teeth and will practice endodontic retreatment.

Without doubt, this course will be a complete learning experience!

Ilan Rotstein, DDS (Course Director)
Associate Professor of Endodontics and Chair, Surgical, Therapeutic and Bioengineering Sciences and Associate Dean for Continuing Oral Health Professional Education at the USC School of Dentistry. Dr. Rotstein has published extensively in the endodontic literature.

Samuel Oglesby, DDS (Clinic Director)
Associate Professor of Clinical Endodontics, Director of the Endodontic Clinics and Director of Predoctoral Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the University of Southern California School of Dentistry.

James Simon, BA, DDS
Professor and Director of Advanced Endodontics at the USC School of Dentistry. Formerly, Director of the Endodontic Residency at the VA Medical Center, Long Beach. Dr. Simon has published extensively in the endodontic literature.

Samir Batniji, DDS, MS, Ed
Associate Professor of Clinical Endodontics at the University of Southern California School of Dentistry, Los Angeles, California. Dr. Batniji maintains private practices in Diamond Bar, San Dimas, Rancho Cucamonga and Fullerton, California.

George Bogen, DDS
Associate Professor of Clinical Endodontics and Assistant Director of Undergraduate Emergency Endodontic Care 1995 - 1998 at the USC School of Dentistry. Dr. Bogen maintains a private Endodontic practice in Los Angeles.

Jack Brown, DDS, MSD
Associate Professor of Clinical Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry. Dr. Brown maintains a private practice in Beverly Hills, California.

Stanley Malamed, DDS

Dan Kolzet, DMD
Assistant Professor of Clinical Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry. Dr. Kolzet was previously faculty at the Department of Endodontics University of North Carolina School of Dentistry for 23 years.

Thomas Levy, DDS, MS
Clinical Instructor of Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry, Los Angeles. Dr. Levy practiced endodontics in Stockton, California for 23 years.

Ilan Rotstein, DDS (Course Director)
Assistant Professor of Clinical Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry. Dr. Rotstein has published extensively in the endodontic literature.

Therapeutic and Bioengineering Sciences at the University of Southern California School of Dentistry.

Therapeutic and Bioengineering Sciences at the University of Southern California School of Dentistry.

David O'Dell, DDS, BSc
Associate Professor of Clinical Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the University of Southern California School of Dentistry, Los Angeles, California. Dr. O'Dell maintains a private endodontic practice in San Juan Capistrano, California.

Thomas Levy, DDS, MS
Clinical Instructor of Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry, Los Angeles. Dr. Levy practiced endodontics in Stockton, California for 23 years.

Knowledge is Power

Topics to be covered:

• Diagnosis and treatment planning
• Case selection in endodontics
• Endodontic emergencies
• Achieving effective anesthesia for endodontic treatment
• Management of anxiety and pain in endodontics
• Preparation for endodontic treatment
• The operating microscope and its uses in endodontics
• Current principles of endodontic access
• Canal length determination including electronic apex locators
• Root canal cleaning and shaping
• Nickel Titanium rotary instrumentation
• Intracanal medication
• Procedural errors and their prevention
• Root canal obturation
• Post-endodontic restoration
• Endodontic retreatment
• Root resorptions
• Clinical applications of MTA
• Endodontic-periodontal interrelationship
• Restoration of endodontically treated teeth

Endodontics From A to Z - Registration Form

(please use or xerox this page and send. Online registration at www.uscdentalce.org)

Refund policy: Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before this course. No refund is granted afterwards. A $60 fee is withheld for processing. For additional regulations, submit this form and send via regular mail.

Upon completion of this course you will be able to:

• Enhance your knowledge of the clinical and biological concepts of modern endodontics
• Successfully treat single-rooted and multi-rooted teeth
• Apply system-based approaches and state-of-the-art technology for treating your endodontic cases
• Use endodontic hand and rotary instruments safely and effectively
• Understand the indications and apply appropriate techniques for endodontic retreatment
• Approach your endodontic cases with confidence and enjoy more predictable results
• Know when and what to refer
