Esthetic Bone Grafting for Implant Site Development

USC School of Dentistry
Saturday, March 24, 2007
9:00 a.m. - 5:00 p.m.
This advance bone graft course will feature scientific lectures and a hands-on workshop. The course will focus on the most current and practical techniques in bone grafting to improve long-term clinical success with dental implants. This course is designed for the clinician that has prior experience in placing implants and who would like to broaden his/her knowledge and scope of practice and improve surgical skills.

Upon completion of this course, participants should be able to:
- Understand bone biology and graft healing
- Perform minimally invasive and esthetic grafting techniques
- Perform alveolar ridge augmentation techniques such as:
  - Maxillary grafting
  - Mandibular grafting
  - Vertical and horizontal alveolar onlay grafting
  - Ridge split/expansion technique
  - Flap designs
- Perform maxillary sinus grafting including:
  - Caldwell-Luc approach
  - Osteotome technique
- Compare various graft materials
- Harvest ramus and chin grafts
- Know practical methods of handling the vertically deficient posterior mandible
- Perform soft tissue procedures to develop grafted sites
- Know abrasional tooth removal techniques to avoid damage to hard and soft tissue architecture
- Perform socket preservation

Testimonials:

What Past Participants Have Said:

“This course was above my expectations. Great organization.”

“Clear, concise, and helpful information!”

“Great clinical information & practical.”

“Thank you for a great course!”
