USC School of Dentistry is an ADA CERP and AGD recognized provider
Gerald L. Vale, DDS, MPH, JD
As Senior Forensic Dental Consultant for Los Angeles County for 39 years, Dr. Vale has conducted or supervised well over 3,000 forensic dental investigations. He has also been a private practitioner, Interim Dean at USC School of Dentistry and Vice President of the Dental Board of California.

Anthony Cardoza, DDS
Dr. Cardoza is a forensic dental consultant for the San Diego County Medical Examiner, Imperial County Coroner, and the State of California Department of Justice Missing Persons unit. Dr. Cardoza is a fellow in the American Academy of Forensic Sciences. Dr. Cardoza resides in El Cajon California where he maintains a practice as a general dentist since 1985.

Testimonials:
“I have enjoyed Dr. Vale’s lectures for 10 years.”

“Very interesting and informative.”

“An absolute pleasure!”

Upon completion of this course participants should:

- Gain familiarity with forensic dentistry procedures
- Know the possibilities and limitations involved in entering this field
- Become aware of dentistry’s possible role in the response to bioterrorism and provision of emergency medical care

This course will present actual cases illustrating the forensic dental techniques used in the investigation of crimes, including homicide, rape, child abuse and battery. It will also cover mass fatality incidents, such as Hurricane Katrina and the World Trade Center disaster. Consideration will be given to the controversial use of bitemark evidence, and to dentistry’s newly proposed role in the response to bioterrorism and the provision of emergency medical care. The extent to which members of the private practice dental team can become involved in this fascinating field, and the limitations of this involvement will be candidly discussed.
