Functional Crown Lengthening Surgery
For Improved and Predictable Restorative Outcomes

Lecture & Hands-On Course

Herman Ostrow School of Dentistry of USC
Saturday, October 1, 2016
9:00 am - 5:00 pm

★ Life-Long Tradition and Excellence ★
Ziv Simon, DMD, MSc
Dr. Simon obtained his DMD degree from Tel Aviv University School of Dental Medicine and his certificate in periodontics from the University of Toronto. He is a Diplomate of the American Board of Periodontology and a Fellow of the Royal College of Dentists of Canada. Dr. Simon is the Founder of the Beverly Hills Multidisciplinary Dental Study Group and the Dental Hygiene Study Club of Beverly Hills. He publishes and lectures on implant dentistry, esthetics and guided surgery and is a reviewer for the Journal of the California Dental Association. He teaches at the Herman Ostrow School of Dentistry of the University of Southern California and conducts hands-on surgical courses nationally and internationally. Dr. Simon maintains a private practice limited to periodontics and dental implants in Beverly Hills, California. He is the creator of SurgicalMaster™, a surgical training program for dentists.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Learn step-by-step techniques for crown lengthening

This course is designed for dentists, periodontists, oral surgeons, prosthodontists, hygienists, dental assistants and all members of the dental team.
Synopsis

Subgingival caries and tooth fractures are common occurrences in clinical practice. They typically lead to difficulties in managing the restorative finish line and to inability to take proper impressions. In other situations, dentists face difficulties obtaining adequate crown retention and a ferrule effect. These can lead to secondary caries, repeated fractures and periodontal complications due to biologic width impingement.

This course is designed to assist clinicians with managing these challenges and explores the periodontal-restorative interface. Participants will learn about functional crown lengthening and its indications prior to restorative treatment. Surgical techniques and how to improve restorative results by incorporating periodontal principles will be reviewed. The hands-on portion will enable participants to practice surgical crown lengthening, including effective flap design and suturing techniques.

Topics To Be Covered

- Indications and contraindications
- Difference between functional and esthetic crown lengthening
- The importance of the biologic width
- What are the restorative considerations relevant to crown lengthening surgery?
- When to “save” a tooth and when to extract?
- Step-by-step surgical technique
- The surgical kit and procedure set-up
- Complications management
- When to refer to a periodontist
Hands-On Exercise

- Incision design
- Soft tissue excisions
- Flap reflection
- Managing the thick palatal tissue
- Ostectomy and osteoplasty
- Surgical hand instrumentation
- Using rotary instruments
- Piezosurgery for crown lengthening
- Managing subgingival tooth fractures
- Quadrant crown lengthening
- Suturing technique

“This is exactly what I was looking for in crown lengthening. Thank you.”
- Dr. George Zatarian, Reno, NV
