Life-Long Tradition and Excellence

Herman Ostrow School of Dentistry of USC
Continuing Professional Education

Herman Ostrow School of Dentistry of USC is an ADA CERP recognized provider
Today older adults are seeking dental care in far greater numbers as their life span lengthens and the numbers of seniors in the population increase. Unique to this population are factors such as variable health profiles, social support systems, and functional capabilities. Oral health findings can also be highly variable whether they are compounded by a lifetime of treatment or neglect. Many individuals or their families expect to maintain or restore their dentition and receive regular oral health care with the latest innovative materials and technology available.

Recognizing the diverse nature of the elderly and their needs, this symposium will approach the older adult from a functional perspective and include topics that cover many of the relevant issues faced when treating aging individuals. Practice approaches for both the healthy, community-based patient and frailer individuals will be discussed.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Upon completion participants should be able to:

- Recognize the importance of functionality to health, including oral health for older adults.
- Understand viable alternatives to implant supported dentures.
- Apply treatment modifications for a range of anesthetics in older adults and better understanding of general anesthesia considerations in older adults.
- Understand the impact of climate change on older adults
- Appreciate the importance of gratitude and resilience in older adults.

Topics to be covered:

- The relationship of function to health, including oral health
- Alternatives to implant supported dentures
- Anesthetic choices in older adults including general anesthesia
- The effects of climate change on older adults.
- What older adults are looking at the dental office.
- Spirituality and Aging: Gratitude and Resilience.

Testimonials:

“Excellent course. I learned a lot. Wide range of information.”
- Anonymous

“I enjoyed and greatly appreciate the information that I received. A great deal of my questions and concerns have been covered. I thank Dr. Mulligan and her great team.”
- Dr. Helen Torabzadeh
