**Online registration at www.uscdentalce.org**

**Refunds** are granted only if a written cancellation notification is received at least 14 days before the course. 50% of the tuition fee will be refunded if cancellation occurs within 7 days before this course. No refund is granted afterwards. A $50 fee is withheld for processing. For additional registrations, xerox this form and send.
George C. Cho, DDS, FACP
Associate Professor in the Division of Primary Oral Health Care, Clinical Director of the Advanced Education in Prosthodontics and Director of Predoctoral Implant Dentistry at the University of Southern California School of Dentistry. Dr. Cho received his dental degree from the University of Southern California, School of Dentistry in 1987. He practiced dentistry and taught at USC School of Dentistry for one year prior to entering the Advanced Education in Prosthodontics Program at USC. He graduated from the program in 1990 and has been since a full time faculty member.

Dr. Cho has developed and taught courses at the pre and postdoctoral levels primarily involved with dental esthetics, implants and fixed prosthodontics. He has published articles and lectured on topics of restorative dentistry and dental materials. Dr. Cho is also a fellow of the American Board of Prosthodontics, member of the American Academy of Restorative Dentistry, ADA, CDA, and Western Los Angeles Dental Society. He maintains a private practice limited to Prosthodontics in Torrance, California.

Lecture: Provisional Restorations - More than just a Temporary
Provisional restorations are an integral part of fixed prosthodontics. In many complex or highly esthetic situations, provisional restorations also play an important diagnostic role. Factors of occlusion, tooth preparation, function, phonetics, soft tissue manipulation and especially esthetics can all be evaluated through the fabrication of a well-made provisional restoration. It is also an important tool of communication to the patient, laboratory, and can help the dentist to anticipate problem esthetic areas. Several techniques will be presented (including Doctor or Dental Assistant fabricated implant provisional restorations) to fabricate multiple-unit esthetic custom provisional restorations with all the characteristics of natural teeth, e.g. translucency, incisal halo, and with minimal chair side time.

Hands-on Laboratory Workshop: Provisional Restorations - Key to Office and Restorative Success
Several fundamental techniques will be taught during the hands-on provisional restoration workshop. Topics of technique and materials will be presented to enhance your skills of fabricating provisional restorations. Indications and contraindications will be presented for the various techniques introduced.

Topics to be covered:
- Excellent fitting single unit temporaries: technique will be taught to fabricate single unit temporaries quickly and efficiently, which should be less than 10 minutes.
- Custom characterization of the provisional restoration: technique will be taught in detail to fabricate multiple unit esthetic custom provisional restorations with all the characteristics of natural teeth e.g. color, contour, characterization, translucency, texture and incisal halo with minimal chair side time.
- Implant provisional restorations: technique will be taught in detail to fabricate implant provisional restorations.

Registration Fees
Before February 25, 2006
Dentist: $195 (Lecture Only) • $595 (Full-Day)
Auxiliary: $115 (Lecture Only) • $395 (Full-Day)

After February 25, 2006
Dentist: $245 (Lecture Only) • $645 (Full-Day)
Auxiliary: $165 (Lecture Only) • $445 (Full-Day)

* Enrollees are required to bring in any implant case that you are currently in progress that has a completed wax-up only on a gold cylinder. Some manufacturer components will be provided to fabricate a completed implant provisional restoration.
