38th Annual Review of Continuing Education in Dentistry
Pain + Fear = Emergency Medicine

Maui
Monday - Thursday
July 23 - 26, 2012
8:00 a.m. - 12:00 p.m.
16 Hours of Continuing Education
The combination of fear of dentistry and pain combine to produce medical emergencies. In this program Drs. Reed & Malamed will discuss the Management of all three areas of great importance: Fear (Sedation), Pain (Local Anesthesia); Fear (Sedation), and the frequent result of inadequate pain control or ignoring of fear: Emergency Medicine. Emergency Medicine can – and do – occur in the practice of dentistry. Two common elements found when emergencies develop are inadequate pain control and ignoring a patients fear. Yet even in the absence of pain or fear, life-threatening medical problems can develop. In this two part discussion, we will discuss the Preparation of the dental office & dental staff to effective recognize and treat emergency situations; (2) The dental office emergency kit, including drugs & equipment, (3) The Basic management of all medical emergencies, and (4) Management of specific problems, such as chest pain, drug overdose (local anesthesia); seizures; and respiratory distress.

3. To include gas and optional coverages. Airfares are

If you have any questions regarding the travel requirements, please contact us at (808) 563-9808. Thank you!

Thank You!
Upon receipt of your completed application and $200 per person deposit, we will mail you a travel confirmation package with all travel details.
Stanley F. Malamed, DDS
Dr. Malamed, a dentist anesthesiologist, graduated from the New York University College of Dentistry in 1969. In 1973, he joined the faculty of the Ostrow School of Dentistry of USC, where today he is Professor of Anesthesia and Medicine and a Diplomate of the American Board of Anesthesiology. During his tenure at the University of Southern California, he has been a recipient of the Hadebrink Award (1996) from the American Dental Society of Anesthesiology and Horace Wells Award from the International Federation of Dental Anesthesiology Societies (1997). Dr. Malamed has authored more than 135 scientific papers and 16 chapters in various medical and dental journals and textbooks in the areas of physical evaluation, emergency medicine, local anesthesia, sedation, and general textbooks. In his spare time, Dr. Malamed enjoys exercising vigorously and has maintained a healthy addiction to the New York Times crossword puzzle, since his freshman year at NYU.

Ken Reed, DMD
Dr. Reed, a dentist anesthesiologist, is Clinical Associate Professor at the Oregon Health Sciences University School of Dentistry, Portland, Oregon and Assistant Director of Advanced Education in General Dentistry, Arizona Regional, at the Lutheran Medical Center, New York. He obtained his D.M.D. from the Oregon Health Sciences University School of Dentistry in 1989 and his specialty certificate in Periodontology in 1991 from the same university. He is a Diplomat of the National Dental Board of Anesthesiology and a member of the Board of Directors of the American Dental Society of Anesthesiology. He is currently Chair of the Committee on Examinations of the American Dental Society of Anesthesiology and Chair of the Component Development of the same organization. Dr. Reed is a reviewer for several dental journals, and has lectured extensively on anesthesiology and related topics.

The combination of fear of dentistry and pain combine to produce medical emergencies. In this program Drs. Reed & Malamed will discuss the Management of the patient state of sedation and effective pain control. Techniques of sedation will be reviewed as well as local anesthetic techniques, and techniques and recent innovations. The program will conclude with the preparation for, and management of, common medical emergencies seen in dentistry.

Day 1: Introduction to the program/Local Anesthesia: Pain and fear are commonplace in the dental environment. Fear of pain is a major reason patients put off seeking treatment until they are in severe pain, yet local anesthetics—dentistry’s most important drugs—represent the safest of all anesthetic techniques. Effective drugs in medicine for preventing and managing pain. This combination of a fearful patient in pain presents a significant challenge to every dentist. In this program, Drs. Reed and Malamed will review three areas of great importance: Pain (Local Anesthesia); Fear (Sedation), and the frequent result of inadequate pain control or ignoring of fear: Emergency Medicine. Pain control through local anesthesia has experienced a renaissance of interest. Exciting developments include: (1) The Anesthetic ‘ON’ Switch – buffered local anesthetics; (2) The Anesthetic ‘OFF’ Switch – phentolamine; (3) Intranasal local anesthesia; (4) Computer-Controlled Local Anesthetic Delivery (C-CLAD), and (5) Mandibular infiltration techniques – include hypnosis, audioanalgesia, video; while pharmacoeconomic techniques include ON/Off depressant drugs administered via the oral, inhalation (N2O-O2), intramuscular, intranasal and intravenous routes. These techniques will be reviewed with a view towards their successful implementation into dental practice.

Day 2: Sedation: ‘Treat the fear first, then pain control will be a minor problem.’ Dentistry has available a number of effective techniques for managing fear. Intravenous – non-drug techniques — include hypnosis, audioanalgesia, video; while pharmacoeconomic techniques include ON/Off depressant drugs administered via the oral, inhalation (N2O-O2), intramuscular, intranasal and intravenous routes. These techniques will be reviewed with a view towards their successful implementation into dental practice.

Day 3 & 4 – Emergency Medicine: Medical emergencies can – and do – occur in the practice of dentistry. Two common elements found when emergencies develop are inadequate pain control and ignoring patients fear. Yet even in the absence of pain or fear, life-threatening medical problems can develop. In this two-part session, Drs. Reed and Malamed will discuss the (1) Preparation of the dental office & dental staff to effective recognize and treat emergency situations; (2) The dental office emergency kit, including drugs & equipment, (3) The basic management of all medical emergencies, and (4) Management of specific problems, such as chest pain, drug overdose (local anesthesia); seizures; and respiratory distress.

Travel Questions and Flight Assistance
Please call our travel desk at University Travel. They will fully assist you.
(800) 821-5904 toll-free nationwide or (818) 563-9808. Fax (818) 563-9842. University Travel, 539 N. Glneciales Blvd., Suite 205, Burbank, CA 91502.

Email: uschawaii@unitrav.com Website: www.uschawaii.com

Travel Package Terms:
Cancellations and Refunds: A deposit of $200 per person accompanied by the Travel Registration Form is required to confirm your reservations. For land package services, your payment is fully refundable until May 31, 2012. Cancellations received after that date are subject to fees. Airfares: Airfares are subject to change until ticketed. Airfares quoted include service fee. Most air tickets are non-refundable after purchase (but may be applied for future transportation credit). Specific air ticket restrictions and cancellation terms will be provided with your written confirmation.

Travel Documents: Will be sent to you after receipt of final payment 2 to 3 weeks before departure including airline tickets and instructions.

Travel reservations are by University Travel (CST Registration #1015591-40).

Thank You! Upon receipt of your completed application and $200 per person deposit, we will mail you a travel confirmation package with all travel details.
