Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

Upcoming Courses

IMPLANT CPR! SUCCESSFUL MANAGEMENT OF PROSTHETIC IMPLANT COMPLICATIONS
Module I - Lecture: Friday, February 6, 2015
Module II - Hands-On: Saturday, February 7, 2015

PORCELAIN VENEERS: OPTIMIZING RESULTS USING SUPRAGINGIVAL PRINCIPLES, AND UNDERSTANDING ADHESION AND OCCLUSION
Friday, February 6, 2015

EMERGING DISEASES, INFECTION CONTROL AND CALIFORNIA DENTAL PRACTICE ACT
Saturday, February 7, 2015

MASTERING MOLAR ENDODONTICS
Friday - Saturday, February 20 - 21, 2015

FUNDAMENTAL PRINCIPLES OF RESTORATIVE IMPLANT DENTISTRY FOR THE SINGLE MISSING TOOTH
Part I - Lecture: Friday, February 20, 2015
Part II - Lecture & Hands-On: Saturday, February 21, 2015

IMPLANT THERAPY IN THE ESTHETIC ZONE
Friday - Sunday, February 27 - March 1, 2015

CHRONIC OROFACIAL, ORODENTAL AND HEADACHE PAINS FOR THE DENTIST
Friday - Saturday, February 27 - 28, 2015

THE SECRETS OF GUIDED BONE REGENERATION IN IMPLANT DENTISTRY: HANDS-ON WORKSHOP
Saturday, March 7, 2015

USC RUTH RAGLAND 29TH DENTAL HYGIENE SYMPOSIUM
Saturday, March 14 , 2015

ESTHETIC FULL-MOUTH IMPLANT RECONSTRUCTION: FROM TREATMENT PLANNING TO FIXED RESTORATION
Module I - Lecture: Friday, March 20, 2015
Module II - Lecture: Saturday, March 21, 2015

3 + 1 Free CE Program

Take any 3 CE courses between January and December 2015 and receive another course for FREE.

★ Life-Long Tradition and Excellence ★
Successful implant osseointegration is well documented over the past forty years. In this course, participants will learn the most predictable manner to diagnose and treat patients presenting missing teeth with dental implants and their restoration. Aspects of treatment planning will be discussed and conventional dentistry vs implant dentistry will be compared. Participants will become knowledgeable about CT scan, radiographic and surgical guides, implant components, implant provisional restorations and screw retained and cement retained restoration.

Part I is designed for those that wish to begin implant treatment for their patients and those that would like a better basic understanding of dental implants.

Part II of “Learning Implant Dentistry” is designed for the dentist who have some experience with implant dentistry and would like to improve their knowledge and skill with implant treatment planning, soft tissue manipulation, and final implant restorations. Single and multiple unit restorations will be discussed along with treatment planning implants and natural teeth for optimum results. The advantages and disadvantages of implant impression techniques will be presented so that the practitioner can become confident with any impression technique. Cement retained vs. Screw retained implant restorations will be presented and recommendations will be given for various situations.

Upon Completion of Part I Participants Will:

- Understand implant components with parts identification
- Be able to discuss optimal implant position
- Understand use and purpose of radiographic and surgical guide
- Become familiar with treatment planning sequence for uncomplicated implant
- Understand the financial implications of implants vs conventional dentistry
- Know how to manipulate soft tissue around implant for best gingival architecture
- Know the sequence for delivering the uncomplicated implant restoration

Part II**: May 9, 2015

Topics to be discussed:

- Treatment planning for single and multiple unit implant restorations
- Cost benefit analysis of teeth vs implant restorations
- CT Scans- planning for restorative driven implant placement
- Radiographic/Surgical Guides- what to look for when evaluating guides
- Implant Components for Restorative Dentistry
- How to form the gingival tissues around implant restoration
- Screw retained implant provisional restorations
- Advantages and disadvantages of cement vs screw retained implant restorations

Upon Completion of Part II Participants Will:

- Know how to treatment plan single and multiple unit implant restorations
- Know how to manage and manipulate soft tissue esthetics around implant restorations
- Understand the cost benefit analysis between natural teeth and implants
- Become familiar with various implant impressions techniques, stock and custom
- Understanding submucosal implant form
- Understand the financial implications of implants vs conventional dentistry
- Know treatment sequencing of implants and natural teeth

Part II** is designed for those who wish to have improved comprehension of implant treatment for their patients. Part I attendance is highly recommend prior to attending Part II.

Upon Completion of Part II Participants Will:
