Herman Ostrow School of Dentistry of USC
Part I - Saturday, March 12, 2016
Part II - Saturday, April 9, 2016

★ Life-Long Tradition and Excellence ★

Learning Implant Dentistry for the Restorative Dentist
Successful implant osseointegration is well documented over the past forty years. In this course, participants will learn the most predictable manner to diagnose and treat patients presenting missing teeth with dental implants and their restoration. Aspects of treatment planning will be discussed and conventional dentistry vs implant dentistry will be compared. Participants will become knowledgeable about CT scan, radiographic and surgical guides, implant components, implant provisional restorations and screw retained and cement retained restoration.

Part I is designed for those that wish to begin implant treatment for their patients and those that would like a better basic understanding of dental implants.

Part II of “Learning Implant Dentistry” is designed for the dentist who have some experience with implant dentistry and would like to improve their knowledge and skill with implant treatment planning, soft tissue manipulation, and final implant restorations. Single and multiple unit restorations will be discussed along with treatment planning implants and natural teeth for optimum results. The advantages and disadvantages of implant impression techniques will be presented so that the practitioner can become confident with any impression technique. Cement retained vs. Screw retained implant restorations will be presented and recommendations will be given for various situations.

Upon Completion of Part I Participants Will:
- Understand implant components with parts identification
- Be able to discuss optimal implant position
- Understand use and purpose of radiographic and surgical guide
- Become familiar with treatment planning sequence for uncomplicated implant
- Understand the financial implications of implants vs conventional dentistry
- Know how to manipulate soft tissue around implant for best gingival architecture
- Know the sequence for delivering the uncomplicated implant restoration

Part II**: April 9, 2016

Topics to be discussed:
- Treatment planning for single and multiple unit implant restorations
- Cost benefit analysis of teeth vs implant restorations
- CT Scans- planning for restorative driven implant placement
- Radiographic/Surgical Guides- what to look for when evaluating guides
- Implant Components for Restorative Dentistry
- How to form the gingival tissues around implant restoration
- Screw retained implant provisional restorations
- Advantages and disadvantages of cement vs screw retained implant restorations

Upon Completion of Part II Participants Will:
- Know how to treatment plan single and multiple unit implant restorations
- Know how to manage and manipulate soft tissue esthetics around implant restorations
- Understand the cost benefit analysis between natural teeth and implants
- Become familiar with various implant impressions techniques, stock and custom
- Understanding submucosal implant form
- Understand the financial implications of implants vs conventional dentistry
- Know treatment sequencing of implants and natural teeth

* Part I is intended for beginners with limited implant knowledge and whose goal is to become familiar with the procedures of Restorative Implant Dentistry.

** Part II is designed for those who wish to have improved comprehension of implant treatment for their patients. Part I attendance is highly recommend prior to attending Part II.

George C. Cho, DDS, FACP
(Course Director)

Dr. Cho is Associate Professor in the Division of Restorative Sciences, Co-Director of the Advanced Education in Prosthodontics and Director of Predoctoral Implant Dentistry at the Herman Ostrow School of Dentistry of USC. Dr. Cho received his dental degree in 1987 and graduated from the Advanced Education in Prosthodontics Program at the Herman Ostrow School of Dentistry in 1990, and has been since a full time faculty member. He is a fellow of the American Board of Prosthodontics, member of the American Academy of Restorative Dentistry, ADA, CDA, and Western Los Angeles Dental Society. Dr. Cho maintains a private practice limited to Prosthodontics in Torrance, California.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP feels that this disclosure is important for the participants to form their own judgment about each presentation.
