General Sessions: Friday - Saturday, January 23 - 24, 2009
Dental Hygiene Forum: Saturday, January 24, 2009
Hands-On & Cadaver Workshop I: Thursday, January 22, 2009
Hands-On & Cadaver Workshop II: Sunday, January 25, 2009
Welcome

Dear colleagues and friends:

We are pleased to invite you to attend the 34th Annual USC International Periodontal & Implant Symposium. The focus of this year’s symposium will be on negative outcomes, complications and failures of periodontal and implant therapy. Great strides have been made in developing advanced periodontal and implant therapies. Despite these advancements, negative outcomes remain a reality in clinical practice. Understanding the biological basis and technical reasons which result in negative outcomes is important in preventing them. It is equally important to learn about the latest strategies for managing complications and failures to reach the desired outcome. Despite the significance of this area for every clinician, most meetings and conferences are dedicated to discussing positive outcomes and very little has been devoted to negative outcomes. A panel of internationally renowned speakers will review and discuss the biological and technical basis of negative outcomes, complications and failures and will present the latest strategies to manage them. The program boasts four days with a diverse range of educational opportunities. These include two all-day programs, with hands-on workshops on models and cadavers. There is also a full-day program dedicated to dental hygienists. Although the majority of the general-session presentations are interdisciplinary in nature, there are also sessions designated as “Surgical Track” and “Restorative Track” that focus on specific disciplines. This is an educational opportunity not to be missed by the entire oral healthcare team, including specialists, restorative dentists and dental hygienists.

We hope to see you all in Los Angeles in January 2009.

Homayoun Zadeh, DDS, PhD
Symposium Chair and Moderator
## Program-At-A-Glance

### Hands-On & Cadaver Workshop I (Thursday, January 22, 2009)

<table>
<thead>
<tr>
<th>Time</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>8:00 am - 5:00 pm</td>
<td>Workshop #1: Surgical techniques for successful root coverage grafting with acellular dermal matrix (Edward P. Allen)</td>
</tr>
</tbody>
</table>

### General Sessions (Friday, January 23, 2009)

<table>
<thead>

Speakers

**Stuart J. Froum, DDS (USA) (Keynote Presentation)**
Dr. Froum is Clinical Professor and the Director of Clinical Research at the Department of Periodontics and Implant Dentistry at New York University Dental Center. Dr. Froum offers the most current techniques in implant treatment. He teaches advanced implant procedures to practicing dentists and dental specialists returning to school and also has extensive experience treating patients in his own private practice. **Leo and Sydelle Ward Foundation Endowed Keynote Lectureship**

Topic: Peri-implantitis & gingival recession around implants: etiology, prevention and treatment

---

**Edward P. Allen, DDS, PhD (USA)**
Dr. Allen is Past-President of the American Academy of Esthetic Dentistry, the American Academy of Restorative Dentistry and the American Academy of Periodontology Foundation. He serves on the editorial boards of several scientific journals. Dr. Allen received the Distinguished Alumnus Award from the Baylor College of Dentistry, the Master Clinician Award from the American Academy of Periodontology and the Best Teacher Award from the American Academy of Esthetic Dentistry. Dr. Allen is Founder and Director of the Center for Advanced Dental Education in Dallas, Texas, where he teaches surgical technique courses. He has published over 50 articles in the area of aesthetic surgery and continues to present numerous lectures and surgical demonstrations worldwide.

Topic: Solving soft tissue problems in implant therapy
- Surgical techniques for successful root coverage grafting with acellular dermal matrix (Hands-On & Cadaver Workshop I)

---

**Su-yan L. Barrow, RDH, MA, MPH (USA)**
Ms. Barrow is Clinical Associate Professor in the Dental Hygiene Program at New York University, New York, where she is coordinator of the Dental Hygiene Baccalaureate Program and in clinical practice part-time. Ms. Barrow is also a city research scientist for the New York’s Department of Health. She holds a B.S. in Dental Health Education and M.A. in Health Education from NYU, a MPH in Community Health Education from Hunter College, City College of New York, and a certificate in Clinical Dental Research Methods from the University of Washington, Seattle. She is currently pursing a doctoral degree in Public Health at Walden University.

Topic: Dentin hypersensitivity - an overview (Dental Hygiene Forum)

---

**Paulo M. Camargo, DDS, MS, MBA (USA)**
Dr. Camargo received his DDS from the University of Parana, Brazil and a certificate in Periodontics from UCLA. He also holds an MS degree in Oral Biology from UCLA and an MBA degree from the Anderson School of Business Management at UCLA. Dr. Camargo is currently a Full Professor of Periodontics at UCLA where he is the clinical director of pre-doctoral Periodontics. He teaches at the pre- and post-graduate levels and conducts clinical and basic research that focuses on periodontal and bone regeneration. Dr. Camargo is a diplomat of the American Board of Periodontology and a fellow of the American College of Dentists. He has over 70 publications and has lectured extensively in the US and abroad. Dr. Camargo also maintains a private practice limited to Periodontics and dental implants in Los Angeles.

Topic: Treating, maintaining and re-treating the periodontal patient: a contemporary approach to non-surgical and surgical therapy (Dental Hygiene Forum)

---

**Giuseppe Cardaropoli, DDS, PhD (ITALY)**
Dr. Cardaropoli, an authority in Experimental Research in Periodontology and Implantology, is currently a Lecturer of the Master in Periodontology, Università La Sapienza Roma, Italy. In 2006, he was appointed as an Assistant Professor in Periodontology and Implant Dentistry at NYU College of Dentistry in 2006 and also served as the Former Director of Experimental Research in the Department of Periodontology and Implant Dentistry at NYU. Dr. Cardaropoli’s expertise is related to experimental and clinical research regarding the healing dynamics in extraction sites and bone defects, ridge alteration following tooth extraction, and implant placement. He is a member of the Editorial Board of Clinical Oral Implant Research, International Journal of Oral and Maxillofacial Implants, and Clinical Implant Dentistry and Related Research.

Topic: Healing following tooth extraction and immediate implant placement
Speakers

**Il Cho, DDS (KOREA)**
Dr. Cho earned his D.D.S from both the Wonkwang University in Korea and the University of Southern California. He received a certificate in Periodontology from Tufts University School of Dental Medicine. He also served as an instructor in postgraduate and undergraduate Periodontology at Harvard School of Dental Medicine and Assistant Professor at Tufts University School of Dental Medicine. He currently maintains a full-time private practice limited to Periodontology and Implants in Korea.

**Topic:** Full mouth rehabilitation using implant supported fixed prosthesis

---

**Lyndon F. Cooper, DDS, PhD (USA)**
Dr. Cooper is the Stallings Distinguished Professor of Dentistry of the Department of Prosthodontics at the University of North Carolina at Chapel Hill. He is currently Chairperson, Acting Director of Graduate Prosthodontics and the Director of the Bone Biology and Implant Therapy Laboratory. Dr. Cooper is a Diplomate of the American Board of Prosthodontics and serves as the President of the American College of Prosthodontics. He received the 2004 Clinician/Researcher Award by the ACP. Dr. Cooper’s laboratory focuses on bone biology, adult stem cell bone regeneration, and clinical evaluation of dental implant therapies. The laboratory receives funding through NIH and by industry collaboration. Their research findings have been presented in over 70 publications and in more than 200 national and international presentations.

**Topic:** Success and failure of dental implant esthetics

---

**Fereidoun Daftary, DDS, MSCD (USA)**
Dr. Daftary received his DDS from the National University of Iran. He did post-graduate training in prosthodontics and earned his Master of Science degree in Dental Material at Boston University. He has held a position as an Assistant Professor at New York University and was Chair of the Department of Fixed Prosthodontics at the University of Southern California School of Dentistry for several years. Dr. Daftary has lectured nationally and internationally on various dental topics. He has also developed and patented the Anatomic Abutment and Bio-Esthetic Abutments as well as Anatomic Implant System. He maintains a private practice in Beverly Hills, California.

**Topic:** Failure after success

---

**Paul Fugazzotto, DDS (USA)**
Dr. Fugazzotto received his DDS from New York University and a certificate in advanced graduate studies in periodontology from Boston University. Dr. Fugazzotto maintains a private practice limited to periodontics and implant therapy in Milton, MA. Dr. Fugazzotto has authored over 80 articles in refereed scientific journals, as well as textbooks. He is an active member of many organizations and is a fellow of the International Team of Implantology. Dr. Fugazzotto is Senior Editor of Implant Realities and he lectures nationally and internationally on a multitude of topics.

**Topic:** Preventing and managing complications with regenerative therapies

---

**Anne Haffajee, DDS (USA)**
Dr. Haffajee received her dental degree from University College Hospital Dental School, London. After her training in Periodontology at the Royal Dental School, London and Dental Public Health, she came to the Forsyth Institute in 1976. She is currently a Senior Member of the Staff and Chair of the Department of Periodontology. Dr. Haffajee and her colleagues were instrumental in recognizing periodontal disease activity as well as defining subgingival species associated with periodontal diseases. The focus of her current research is the effect of different periodontal therapies on clinical and microbiological parameters of periodontal diseases and the composition and development of biofilms on different oral surfaces. She has published over 150 original peer-reviewed articles and over 150 abstracts. She was the winner of the 1995 I.A.D.R. Basic Research in Periodontology Award, The Benjamin Tenenbaum lecturer at Columbia University 2003, The William Evans Visiting Fellow, University of Otago, New Zealand and recipient of the Clinical Research Award from the American Academy of Periodontology, 2003.

**Topic:** The treatment of periodontal infections: understanding success and failure (Dental Hygiene Forum)
Speakers

ToyoHiko Hidaka, DDS, PhD (JAPAN)
Dr. Toyohiko Hidaka received his D.D.S. degree from Tsurumi University School of Dental Medicine in 1982. He also received a PhD degree in Oral Surgery from the same university. He is currently a Clinical Professor at Second Department of Comprehensive Care of Tsurumi University. He is Vice president of the Society of Japan Clinical Dentistry, Tokyo branch, and is also a board member of the Osseo-integration Study Club of Japan.
Topic: Guidelines for aesthetic peri-implant gingival tissue

Sascha A. Jovanovic, DDS, MS (USA)
Dr. Jovanovic was formally trained in Periodontics at UCLA School of Dentistry, in Implant Dentistry at Loma Linda University and in Prosthodontics at University of Aachen, Germany. He holds a Master of Sciences degree in Oral Biology from UCLA. He specializes in dental implant therapy and is a lecturer at UCLA and the Academic Chair of gIDE Education Institute. He is the Past-President of the European Association for Osseointegration (EAO) and a Past-Board member of the Osseointegration Foundation (OF). He teaches worldwide and has published over 60 articles and book chapters.
Topic: Novel bone Grafting indications with rhBMP-2 for implant placement

Young Ku, DDS, MS, PhD (KOREA)
Dr. Ku is an Associate Professor in the Department of Periodontology at Seoul National University (SNU), School of Dentistry, Korea. He graduated from SNU School of Dentistry in 1986 and received MS and PhD degree in SNU. Following two years of active research at UNC at Chapel Hill, NC as a visiting professor, Dr. Ku has published multiple national and international publications on biomimetic surface modification of biomaterials. He is working as a Vice President of the Korean Academy of Oral and Maxillofacial Implantology and also as a Director of Academic Affairs of the Korean Academy of Periodontology.
Topic: Attached peri-implant soft tissue: impact for the long-term success

Ramin Mahallati, DDS (USA)
Dr. Mahallati graduated from the USC School of Dentistry where he also completed his advanced specialty training in Prosthodontics. He is a former assistant Clinical Professor at USCSD. Presently, he maintains a private practice limited to Prosthodontics and dental implant dentistry in Beverly Hills, CA. He is also involved in research in the areas of Implant Dentistry and Dental Materials. He has presented nationally and internationally in the field of Implant Dentistry.
Topic: Prosthetic risk factors for implant failure

Craig M. Misch, DDS, MDS (USA)
Dr. Misch received postgraduate certificates in prosthodontics and oral implantology and a Master of Dental Science degree from the University of Pittsburgh. He then completed specialty training in oral and maxillofacial surgery in Pittsburgh. Dr. Misch holds dental faculty appointments at New York University, the University of Florida and the University of Pittsburgh. He is a Diplomate of the American Board of Oral and Maxillofacial Surgery and currently practices as a dual specialist in Sarasota Florida. He is on the editorial boards of several professional organizations.

Michael Norton, DDS (UNITED KINGDOM)
Dr. Norton is a graduate of the University of Wales School of Dental Medicine. He runs a dedicated implant practice in Harley Street, London. He is a specialist in Oral Surgery and is Visiting Professor at Marquette Dental School in Milwaukee, USA. He was recently awarded the prestigious Fellowship of the Royal College of Surgeons, Edinburgh for his contribution to the field of implant dentistry. Dr. Norton is Past President and currently Scientific Chairman of the Association of Dental Implantology, UK and is both Board Member and Fellow of the Academy of Osseointegration (AO). He is the immediate Past Editor of the AO’s Academy News and is currently Associate Editor of the International Journal of Oral & Maxillofacial Implants. He also serves as a referee for a number of other peer-review journals. Dr. Norton lectures internationally, and is widely published in the literature including one of the earliest Quintessence textbooks on the subject published in 1995. He is a joint owner and editor of the journal Dental Implant Summaries.
Topic: Immediate provisionalization – challenging frontiers and respecting boundaries
Speakers

Dale Rice, MD (USA)
Dr. Dale Rice is professor and Chair, Department of Otolaryngology, Keck School of Medicine at USC. He earned his degree at University of Michigan and also completed his residencies in General Surgery and Otorhinolaryngology at University of Michigan. He has served on the board of American Board of Otolaryngology. He holds memberships in the American Academy of Otolaryngology Surgery, American College of Surgeons, and American Laryngological Rhinological & Otol. Soc. His research and clinical interests include head and neck cancer and sinus disease. He also has a clinical interest in Transfusion free (bloodless medicine).
Topic: Maxillary Sinus Complications

Giorgio Tabanella, DDS, MS (ITALY)
Dr. Tabanella is a Diplomate of the American Board of Periodontology. He graduated from the University of Southern California where he obtained a Certificate in Periodontics as well as the Master of Science in Craniofacial Biology. He received the Outstanding periodontal graduate student award in surgery & implantology by the California Society of Periodontists. He is the Scientific Coordinator of the International Implant Conference and author of several articles published in peer-reviewed journals. Dr. Tabanella has lectured in Europe as well as in the US. His research focuses on peri-implant bone loss, and soft and hard tissue reconstruction. He maintains a private practice limited to periodontology, reconstructive and implant surgery in Rome, Italy.
Topic: From peri-implant bone loss to iatrogenic dentistry: managing hard and soft tissue reconstruction

Parish Sedghizadeh, DDS, MS (USA)
Dr. Sedghizadeh is Assistant Professor of Clinical Dentistry at the USC School of Dentistry. He received his Bachelor of Science degree in biology from UCLA, his D.D.S. degree from USC, and specialty training in Oral and Maxillofacial Pathology from the Ohio State University, where he attained an M.S. degree in oral biology and fellowship status in the American Academy of Oral and Maxillofacial Pathology. In Ohio, Dr. Sedghizadeh was awarded fellowship by the American Cancer Society for conducting research at the Arthur G. James Cancer Hospital and Richard J. Solove Research Institute, investigating the early molecular events involved in the progression of head and neck cancer. Dr. Sedghizadeh is a Diplomate of the American Board of Oral and Maxillofacial Pathology.
Topic: Osteonecrosis of the jaws (ONJ) secondary to bisphosphonate therapy: insights into pathogenesis, risk assessment, clinico-pathologic features and therapeutic rationale

Kurt Tennyson, CDT (USA)
Mr. Tennyson received his education in Dental Technology at Orange Coast College and Maxillofacial Prosthetic Training Program at UCLA. In 1979 he worked for Project Hope, establishing a Maxillofacial Program in Alexandria, Egypt. He spent 12 years with UCLA Maxillofacial / Hospital Dentistry Group and has received Lifetime Credential to teach Dental Technology. He owns and operates Excel Maxillofacial Prosthetic Laboratory. He is the President of the Tennyson Study Club. Mr. Tennyson lectures extensively nationally and internationally on the topic of dental implants.
Topic: How your laboratory can help with Plan B for best results

Homayoun H. Zadeh, DDS, PhD (USA) (Symposium Chair & Moderator)
Associate Professor, USC School of Dentistry. Dr. Zadeh is a graduate of the USC School of Dentistry. He completed the advanced clinical education in Periodontology and earned his PhD degree in Immunology from the University of Connecticut. He is a Diplomate of the American Board of Periodontology. He serves as the editorial reviewer for several scientific journals, and chairs a Scientific Study Section of NIH. Dr. Zadeh also leads a research team, funded by the NIH. His clinical research interests involve studies on minimally-invasive surgery and tissue engineering. He is Director of USC International Periodontal and Implant Symposium and maintains a part-time private practice limited to Periodontology and Implants in Southern California.
Workshops

Hands-On & Cadaver Workshop I - Jan 22, 2009
Surgical Techniques for Successful Root Coverage Grafting with Acellular Dermal Matrix
Speaker: Edward P. Allen, DDS, PhD
This course will present the Alternate Papilla Tunnel Technique and the Papilla Retention Pouch Technique for root coverage grafting with AlloDerm. Microsurgical site preparation, allograft preparation, graft insertion, and specialized suturing techniques will be described and performed in this hands-on cadaver course.

Upon completion of this course participants will be able to:
• Differentiate sub- and supra-periosteal dissection
• Describe the location of the mental foramen relative to the depth of pouch dissection
• Develop a “feel” for pouch preparation with microsurgical instrumentation
• Perform the subgingival continuous double-back sling suture technique

Hands-On & Cadaver Workshop II - Jan 25, 2009
Ridge Augmentation Techniques for Dental Implants: Cortical block bone grafts and rhBMP-2
Speaker: Craig M. Misch, DDS, MDS
The choice of material and technique for bone augmentation is dependent on a number of factors including ridge morphology, degree of atrophy, bone volume requirements and clinician experience and preference. Successful bone regeneration may be obtained with autogenous block bone grafting, guided bone regeneration, titanium mesh with bone graft, distraction osteogenesis, as well as more recently with recombinant human bone morphogenetic protein (rhBMP-2).

Upon completion of this course participants will be able to:
• Identify cases applicable for cortical bone grafts and the titanium mesh technique
• Understand clinical techniques for harvesting autogenous bone and using block bone grafts
• Understand clinical techniques for using titanium mesh with graft materials and rh-BMP-2 with absorbable collagen

General Information

EVENT LOCATION
Wilshire Grand Los Angeles
930 Wilshire Blvd., Los Angeles, CA 90017
• Right in the heart of downtown Los Angeles
• 25 minutes from Los Angeles International Airport
• Minutes away from CA-110, I-10, I-101, and I-5.
  Telephone: 213-688-7777
  Reservation: 888-773-2888 (ask about the room block by USC School of Dentistry)
  Website: www.wilshiregrand.com
• Book your rooms early! Special rate for singles/doubles is $149 per night and $189 for executive level booking prior to January 15, 2009. Please log onto https://resweb.passkey.com/Resweb.do?mode=welcome_gi_new&groupId=149837 or call 888-773-2888 to book your room.
