112 Years of Tradition and Excellence

USC International Restorative Dentistry Symposium:

Interdisciplinary Approaches to Restorative Care

Friday - Saturday, October 9 - 10, 2009
9:00 am - 5:00 pm
Davidson Executive Conference Center
University Park Campus
www.uscrestorativedentistrysymposium.org
Dear Friends and Colleagues:

It gives me great pleasure to invite you to attend the USC International Restorative Dentistry Symposium for 2009. The goal of this symposium is to update the general dental community on contemporary “hot” topics related to restorative dentistry. The symposium will be showcasing current, evidence based knowledge, through presentations by nationally and internationally renowned speakers who are opinion leaders, academicians, educators and researchers.

The theme for this year is an Interdisciplinary Approach To Restorative Care. It is generally accepted that optimum restorative care in the 21st century is a combination of minimally invasive dentistry to preserve and restore the natural biologic tissues while utilizing implants to replace missing or failing teeth. In addition, it is no longer accepted for patients to “just have teeth”, but rather have teeth that function and “look and feel good”.

- What are the opportunities and the responsibilities of the restorative dentist for maximum patient benefit?
- What are the long-term complications, predictors and risk factors of implants in the young patient?
- Which cases can benefit esthetically and biologically from minor orthodontic tooth movement prior to restorative care?
- Are indirect full coverage restorations always necessary to restore endodontically treated teeth?
- What is the latest on new technologies such as CAD/CAM, 3-D imaging and high strength porcelains?
- What is the contemporary role of occlusion in today’s highly esthetically driven treatments?

These are some important questions that this year’s symposium will address. In the process of answering these questions our carefully selected panel of experts will provide valuable information that will help you have a more in-depth understanding of the steps necessary to insure successful outcomes and develop better relationships with your specialist colleagues and referring dentists.

We hope to see you in what promises to be a most enjoyable and educational experience.

Until then respectfully,

Abdi Sameni, DDS
Symposium Chairman
Dear Colleagues:

Welcome to the 2nd USC International Restorative Dentistry Symposium.

In the end it all boils down to one thing; being able to formulate a custom-tailored treatment plan that addresses patient current and future needs and to execute it to the highest clinical level possible using state-of-the-art techniques and technologies.

To successfully meet this simple requirement one needs a curious and disciplined mind that refuses to accept anything short of outstanding, and truly enjoys being a lifelong learner. The track record of the USC School of Dentistry in graduating world renowned leaders is well known. This is the end product of an environment that isn’t static, a place in which the envelope is being pushed time and again; I can’t think of a better place to be for acquiring new knowledge and interacting with colleagues and friends. The program chair, Dr. Sameni, and the faculty have lined up an exciting and educational program that will expose you to the newest treatment modalities, treatment options, and step-by-step techniques.

Thank you for taking time away from your practice; this will be time well spent.

Sincerely,

Avishai Sadan, DMD
Dean, USC School of Dentistry
Antonio Cerutti, MD, DDS (Italy): New Perspectives and Excellence in Esthetic Composite Restoration

Prof. Antonio Cerutti received his M.D. degree from University of Milan and D.D.S. post graduate certificate with cum laude from the University of Pavia. He became Professor of Restorative Dentistry at the Dental School of the University of Brescia (Italy), where he is Chair and Director of the Restorative Department. He is an active member of the Endodontic Italian Society (SIC), an active and former Board Member of the Italian Restorative Dentistry Society (SIDOC) and a Member of International Association of Dental Research (IADR). He is further Editor in Chief of the Italian Journal of Endodontics. Prof. Cerutti is the author of more than 150 scientific papers and extensive publications in restorative dentistry and endodontics. He is the co-author of the multimedia textbook Guidelines in Adhesive Dentistry: the key to success, Quintessenz Verlags-GmbH, Berlin 2007 (published in Italian, English and German) and textbook Restauri estetico-adesivi indiretti parziali nei settori posteriori Uitet Scienze Mediche 2007. He is a lecturer at international congresses and hand-on courses in Europe and the Middle East. Prof. Cerutti is the Principle Investigator for several clinical international/national trials based on composite materials and restorative techniques. He is an Analyst and Opinion Leader for clinical trials for major restorative and endodontics manufacturers. Prof. Cerutti runs a private practice limited to restorative dentistry and endodontics in Italy.

Fereidoun Daftary, DMD, MSD (USA): Dento-Alveolar Growth and Implant Success

Dr. Daftary received his dental education from the National University of Iran and has completed post-graduate training in prosthodontics at Boston University. He has served as Chair of the Department of Fixed Prosthodontics at USC. He is a frequent lecturer at national and international meetings. He has also developed and patented many implant components. His current research focuses on improving implant esthetics and function. Dr. Daftary maintains a private practice limited to prosthodontics and implant dentistry in Beverly Hills, California.

David Guichet, DDS (USA): Risk Assessment & Predictable Success in the Esthetic Zone

Dr. Guichet is a Diplomate of the American Board of Prosthodontics and a graduate of the Maxillofacial Prosthetics Residency at UCLA. He completed a Prosthodontic Residency at the VAMC Wadsworth in West LA, a GPR at the VAMC in Long Beach CA, and received a DDS from UCLA. Dr. Guichet served as editor for the Academy of Osseointegration News and as Past President of the Osseointegration Foundation. Together with his brother and father, he maintains a prosthodontic practice in Orange, California where he has developed and installed a comprehensive digital clinical records process.

Mark Handelsman, DDS (USA): From Discussion to Completion: Communication, Communication, Communication

Dr. Handelsman received his D.D.S. in 1987 from the University of Southern California School of Dentistry. He continued his studies at USC, and obtained his Certificate in Advanced Periodontics in 1989. He is a Diplomate of the American Board of Periodontology since 1994. He was a Clinical Assistant Professor at USC for 15 years, teaching Periodontics and Dental Implants, as well as practicing in the faculty practice. He has been in full time private practice in Santa Monica, California for the last 6 years. He has been involved in clinical research and published many articles. The topics include the Perio-Restorative interface, Guided Tissue Regeneration, Guided Bone Regeneration, Esthetic Soft Tissue Grating and Surgical techniques for site development and implant placement. He has lectured nationally and internationally.
### Saj Jivraj, DDS, MSEd (USA): A Comprehensive Approach to Interdisciplinary Treatment Planning

Dr. Saj Jivraj completed his dental degree at the University of Manchester in England and his Advanced Prosthodontic training at the University of Southern California. He is the former Chairman Section of Fixed Prosthodontics and Operative Dentistry at USC School of Dentistry. Dr. Jivraj has published numerous articles on Esthetic and Implant Dentistry in peer reviewed journals, and has presented on aspects of implant dentistry and advanced prosthodontic procedures both nationally and internationally. He is co-author of the textbook *Treatment Planning in Implant Dentistry*, published by the British Dental Association. He currently holds a faculty position as an Clinical Associate Professor in the Graduate Prosthodontics program at the USC School of Dentistry. He maintains a private practice limited to Prosthodontics and Implant Dentistry in Oxnard, CA.

### Bach Le, DDS, MD, FICD (USA): Risk Assessment & Predictable Success in the Esthetic Zone

Dr. Le is a Clinical Associate Professor, Division of Surgical Therapeutic and Bioengineering Sciences and Assistant Director, Oral and Maxillofacial Surgery, USC School of Dentistry and USC Medical Center. He is a Diplomate of the American Board of Oral & Maxillofacial Surgeons, the American Dental Society of Anesthesiologists, and the International Congress of Oral Implantologists. Dr. Le holds fellowships in the International College of Dentists and the International Association of Oral & Maxillofacial Surgeons. Dr. Le maintains a private practice in Whittier, California.

### James Mah, BSc, DDS, MS, DMSc (USA): 3-D Imaging with Cone-Beam CT for the General Dentist

Dr. James Mah is an Clinical Associate Professor at the University of Southern California and the University of Nevada, Las Vegas. At USC he is the Director of the Redmond Imaging Center and Director of the Craniofacial Virtual Reality Laboratory. Dr. Mah obtained his Bachelor of Science, Doctorate of Dental Surgery, Master of Science degrees and his Certificate of Specialization in Orthodontics from the University of Alberta, Canada. He also graduated from Harvard Medical School with a Doctorate of Medical Science degree and completed a Post-Doctoral Fellowship in the Department of Orthopaedics at Children’s Hospital, Boston. His current research has been focused on creating virtual 3-dimensional craniofacial patients upon which diagnosis, treatment planning and simulations can be performed.

### Baldwin Marchack, DDS, MBA (USA): Taking the Mystery out of the New Generation of All-Ceramic Restorations For Natural Teeth and Implants

Dr. Marchack graduated from USC School of Dentistry and received his MBA from UCLA. Dr Marchack is the immediate Past President of the American Academy of Esthetic Dentistry, the Vice-Chair of the Editorial Council for the Journal of Prosthetic Dentistry, President-Elect of the Pacific Coast Society for Prosthodontics, Vice-President of the American Prosthodontic Society and serves on the Board of Councilors of the USC School of Dentistry. He is the author of numerous articles and has presented over 200 lectures nationally and internationally. Dr. Marchack maintains a private practice with a main emphasis on restorative and implant dentistry in Pasadena, California.

### Tif Qureshi, BDS (United Kingdom): The Inman Aligner and its effect on Cosmetic Dentistry

Dr. Qureshi qualified from Kings College London in 1992. He is a partner at Dental Elegance in Sidcup and has been with the practice for 15 years. He has a special interest in minimally invasive cosmetic dentistry. Tif is the UK pioneer and the world’s most experienced clinician of the Inman Aligner. He lectures nationally and internationally on the appliance as a standalone treatment and its ability to facilitate minimal cosmetic dentistry. The Inman Aligner is revolutionizing the way cosmetic dentistry is being done all over the UK by encouraging dentists to move away from heavy tooth preparation to fast simple alignment, bleaching and bonding, or truly minimal prep veneers. He has completed over 600 cases using the system. Tif is on the Board of Directors of the British Academy of Cosmetic Dentistry www.bacd.com the UK’s leading academy in cosmetic dentistry. Tif is a member of the British Orthodontic society and the London Dental Fellowship.
Steve Ratcliff, DDS, MS (USA): I Made it Pretty, Why Did it Break: When Esthetics isn’t Enough

Dr. Ratcliff is the former Chairman, Department of Education at The Pankey Institute for Advanced Dental Education and is currently the International Liaison for the Institute. He is recognized as an innovator and visionary in dental education, and has a passion for helping dentists succeed. He is a thoughtful, engaging speaker and his down-to-earth approach leaves his audiences enthused and inspired. His primary teaching interests are related to Philosophy of Dental Practice, Function and Aesthetics, and Interdisciplinary Care and Virtual Dentistry. Dr. Ratcliff writes and lectures internationally on these topics and currently practices dentistry in Key Biscayne, Fl and continues teaching in a variety of venues. He works extensively with study clubs in the US and Europe.

Mamaly Reshad, BDS, MSc (USA): A Comprehensive Approach to Interdisciplinary Treatment Planning

Dr. Reshad graduated with a BDS degree from Kings College Dental School in England. He later worked as a general practitioner for nine years before embarking on his MSc program in Restorative Dentistry at the Eastman dental institute in London. Dr. Reshad was awarded a Masters degree with distinction. He later completed his residency in advanced prosthodontics at the USC school of Dentistry. He has published articles in peer review journals on topics related to implant dentistry and has lectured nationally and internationally.

Avishai Sadan, DMD (USA): High Strength All Ceramic Restorations - An Update

Dr. Sadan is Dean, University of Southern California School of Dentistry, Los Angeles, CA. He is the former editor-in-chief of Quintessence International and Quintessence of Dental Technology (QDT), served on the editorial boards of other journals, and has lectured and published nationally and internationally on fixed and implant prosthodontics and biomaterials. He received his training in prosthodontics from the LSU School of Dentistry and has also completed a fellowship in prosthodontics emphasizing esthetic and implant dentistry at LSU. He is a member of several professional organizations and maintains an intramural practice limited to fixed and implant prosthodontics.

Abdi Sameni, DDS (USA): From Discussion to Completion: Communication, Communication, Communication

Dr. Abdi Sameni is a Clinical Associate Professor of Dentistry and a 1991 graduate of USC School of Dentistry. He has been a member of the USC clinical faculty since 1998. He currently serves as senior faculty for the “esthetic selective” which emphasizes a “biomimetic approach” to restorative and esthetic care. He was the original director of the USC Advanced Esthetic Dentistry Continuum for the portion relating to indirect porcelain veneers. He currently is the course director for an intensive “lecture” and “hands-on” course relating to indirect bonded porcelain restoration and he is the chairman and developer of the “USC International Restorative Dental Symposium.” Dr. Sameni lectures nationally and internationally on topics related to interdisciplinary dentistry, digital photography and its applications for dentistry, and various aspects of biomimetic and esthetic dentistry. Dr. Sameni is Past-President of the USC Dental Alumni Association, President of the USC Century Club and a member of the Board of Counselors for the USC School of Dentistry. He maintains a private practice in West Los Angeles, where he emphasizes comprehensive restorative dentistry, including implant reconstruction and esthetic dentistry.

Cherilyn G. Sheets, DDS (USA): The Restorative Dentist’s Role in Interdisciplinary Treatment

Dr. Cherilyn Sheets maintains a full-time private practice in Newport Beach, California for esthetic rehabilitative dentistry. She is an international educator, clinician, author and lecturer, and received the 2002 Gordon Christensen Award for Excellence in Lecturing, the 2004 USC School of Dentistry Alumnus of the Year Award, and the 2006 Section Honor Award (Distinguished Dentist Award) from the California Section of the Pierre Fauchard International Honor Dental Academy. She is a Past President of the American Academy of Esthetic Dentistry and the American Association of Women Dentists. Dr. Sheets is Co-Executive Director of the Newport Coast Oral Facial Institute, a Clinical Professor of Restorative Dentistry at the University of Southern California, Chairman Emeritus of The Children’s Dental Center, and Founding Chairman of the National Children’s Oral Health Foundation. With the University of California Irvine (UCI) School of Engineering, she is leading research on energy dissipation in teeth and implants together with James C. Earthman, Ph.D.

“I had the honor of being a participant in last year’s 1st Restorative Symposium and I thought the speakers and content of the lectures were sensational. This year’s Symposium looks to be even better. Do not miss it.” - Richard Kahn DDS, Associate Professor, USCSD

“Thank you Abdi for putting together a wonderful symposium with excellent topics by a variety of world-renowned speakers. I learned so much and most important I was able to take the information and apply it.” - Patricia Ryan, DDS, Clinical Assistant Professor, USCSD

“It was truly a privilege to both participate and to learn at such a landmark event as the first USC International Restorative Symposium. The outstanding presentations over the two days provided a wealth of practical, relevant, and timely information. I look forward to hearing another impressive lineup of speakers at the 2009 symposium.” - Edmond R. Hewlett, DDS, Associate Professor and Vice Chair, Division of Restorative Dentistry, UCLA School of Dentistry

“It appears that the 2009 USC Restorative Symposium will be even better than 2008’s, which was amazing. What a wonderful learning opportunity.” - Gary Harmatz, DDS, Clinical Professor, USCSD

“The USC International Restorative Symposium exemplifies USC’s rich tradition and reputation and one of the world’s premier clinical restorative dental schools. The quality of the presentations and the synergy created by both those attending and presenting made this an invaluable experience. It was a world-class learning experience.” - Sigmund Abelson, DDS, Acting Dean, USCSD

“Thank you so much for organizing the Restorative Symposium. I found it to be the highlight educational experience of the year. Not only was it replete with the latest in restorative, esthetic and implant dentistry. An added bonus was the opportunity to socialize with practitioners and faculty with whom I share professional interests.” - Alvin Rosenblum, DDS, Clinical Professor, USCSD

“Last year’s inaugural Restorative Symposium was outstanding. The speakers, several of whom traveled from overseas, had a great deal to offer and we to absorb. The knowledge to be gained in this era of constantly changing materials and technique modifications, utilizing a interdisciplinary approach, makes it imperative that we continue to attend these symposiums whether we practice or teach. I am looking forward to this year’s Second Restorative Symposium at USCSD.” - Leon F. Unterman, DDS, Clinical Instructor, USCSD
