Healthier Indirect Restorations, Using a Supra-gingival Protocol

Herman Ostrow School of Dentistry of USC
Friday - Saturday, October 6 - 7, 2017
9:00 a.m. - 5:00 p.m.
Limited Attendance
Lecture and Hands-On Workshop
Healthier Indirect Restorations,
Using a Supra-gingival Protocol

Synopsis

Improved esthetic results achieved with non-metal veneers, onlays and full crowns have increased their use and enhanced patient acceptance and satisfaction. Nevertheless, clinicians often feel that these restorations are more difficult and less predictable than traditional ones. In this course, participants will learn how to properly perform non-metal restorations to make esthetic dentistry more predictable, trouble-free and healthier for the patient.

In this workshop, Dr. Ruiz will first demonstrate, on a live patient, an innovative paradigm for preparation and cementation. He will also show a simple and predictable system for performing comprehensive diagnosis, esthetic evaluation and occlusal diagnosis, that is indispensable for predictability, longevity and successful esthetic outcome. In addition, step-by-step techniques and principles for tooth preparation, temporization, and sensitive-free easily bonded cementation will be shown.

During the workshop, participants will perform, in very realistic simulators, tooth preparations specific to supra-gingival dentistry for porcelain veneers and non-metal onlays. Participants will also bond porcelain veneers and onlays using the techniques learned.

Upon completion of this course participants should:

• Understand the benefits of supra-gingival dentistry by observing live preparation and cementation procedures for non-metal veneers.

• Know simple and predictable tooth preparation techniques specific to supra-gingival dentistry and perform multiple veneer, onlay and crown preparations in a simulator.

• Be able to use a predictable impression technique; never do a retake!

• Know how to choose the correct type of restorative material and translucency.

• Understand which bonding systems and cements are most esthetically appropriate to achieve good margin blending.

• Know how to perform sensitive-free and easy cementation techniques for anterior veneers and posterior onlays.

*This course was simply outstanding and exceeded my expectations. The concept of conserving sound tooth structure and placing supragingival margins is undervalued in dentistry. This course emphasizes techniques to minimize unnecessary iatrogenic tooth trauma that often results with "traditional" prep designs.*

- Dr. Herb Edwards

Jose-Luis Ruiz, DDS, FAGD

Dr. Ruiz has been named as one of the “Top 100 Clinicians in CE” (2006 - 2016) in the US by Dentistry Today. He is a Fellow of the Academy of General Dentistry, Associate Instructor and Mentor at PCC Utah, teaching with Dr. Gordon Christensen, and an independent evaluator of dental products for CR (CRA). Dr. Ruiz has been practicing General Dentistry in the Film Studio District of Los Angeles for over 20 years, where he treats many stars and entertainers. He is regularly consulted on Esthetic Dentistry and his esthetic makeovers have been featured on a number of television shows including NBC Channel 4 News, ABC 7 GMA & Vista LA, VH1 and Channel 52 Telemundo. Dr. Ruiz lectures nationally and internationally and has published multiple papers on cosmetic dentistry, adhesive dentistry and occlusion.

Boris Keselbrener, DDS

Dr. Keselbrener is Assistant Professor of Clinical Dentistry in the Division of Restorative Sciences at the Herman Ostrow School of Dentistry of USC. He is the Course Director for the ASPID preclinical fixed prosthodontics and Co-Director of operative/fixed preclinical courses, as well as instructor in occlusion and morphology courses.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or roles as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
