ENDODONTICS FROM A TO Z
Friday - Sunday • June 11 - 13, 2004 • June 25 - 27, 2004
A HANDS-ON WORKSHOP COURSE
38 Hours of Continuing Education • Limited Attendance

Samir Bhatnaji, DDS, MS, Ed
Associate Professor of Clinical Endodontics
at the University of Southern California
School of Dentistry, Los Angeles, California.
Dr. Bhatnaji maintains private endodontic
practices in Diamond Bar San Dimas,
Rancho Cucamonga and Fullerton, California.

George Bogin, DDS
Assistant Professor of Clinical Endodontics
and Assistant Director of Undergraduate
Emergency Endodontic Care 1995 – 1998 at
the USC School of Dentistry. Dr. Bogin
maintains a private endodontic practice in
Los Angeles.

Jack Brown, DDS, MSD
Associate Professor of Clinical Endodontics,
Division of Surgical, Therapeutic, and
Bioengineering Sciences at the USC School
of Dentistry, Los Angeles. Dr. Brown
maintains a private endodontic practice in
Beverly Hills, California.

Nestor Cohene, DDS
Assistant Professor of Clinical Endodontics,
Division of Surgical, Therapeutic, and
Bioengineering Sciences and Coordinator of
Trauma at the Center for urgent Care,
Trauma and Sports Dentistry at the USC
School of Dentistry.

Keith Komatsu, DDS
Assistant Professor of Clinical Endodontics,
Division of Surgical, Therapeutic, and
Bioengineering Sciences at the USC School
of Dentistry, Los Angeles. Dr. Komatsu
maintains a private endodontic practice in
Redondo Beach, California.

Stanley Malamed, DDS
Professor of Anesthesia and Medicine at the
USC School of Dentistry. He authored 3 widely
used textbooks: Handbook of Medical Emergencies
in the Dental Office (4th ed., 2004), Handbook of
Local Anesthesia (4th ed. 1991) and Sedation – A

Samuel Oglesby, DDS
Associate Professor of Clinical Endodontics,
Director of the Endodontic Clinics and Director
of Predoctoral Endodontics, Division of
Surgical, Therapeutic, and Bioengineering
Sciences at the University of Southern
California School of Dentistry

Ilan Rotstein, DDS
Associate Professor and Chair, Division of
Surgical, Therapeutic, and Bioengineering
Sciences and Associate Dean for Continuing
Oral Health Professional Education at the USC
School of Dentistry. Dr. Rotstein has published
everseasally in the endodontic literature.

James Simon, BA, DDS
Professor and Director, Advanced
Endodontics at the USC School of
Dentistry. Formerly, Director of the
Endodontic Residency at the VA Medical
Center, Long Beach. Dr. Simon has published
everseasally in the endodontic literature.

Endodontics has gone through many exciting changes in the past several years. Recent advances in technology, materials and equipment have changed the way endodontics is practiced today. These advances have made it possible to efficiently perform successful endodontic treatment with improved precision, predictable results and with much greater patient acceptance.

This comprehensive state-of-the-art course includes series of seminars and hands-on workshops specially designed for General Dentists who wish to advance their knowledge and clinical skills in the art and science of endodontics. A team of endodontic specialists from USC School of Dentistry will thoroughly discuss evidence-based clinical and biological concepts of modern endodontic therapy. These experts will walk you, from start to finish, through all the necessary steps and phases that will enable you to enhance the way you practice endodontics so you can provide the best standards of endodontic care to your patients. During the hands-on part of this course you will have the opportunity to apply the principles discussed by the USC team of experts and practice in our famous “Sim-Lab”, one of the most modern and realistic simulator facilities in California. You will perform endodontic treatment from start to finish in both single-rooted and multi-rooted teeth and will practice endodontic retreatment. Without a doubt, this course will be a complete learning experience!

Topics to be covered:

• Diagnosis and treatment planning
• Case selection in endodontics
• Endodontic emergencies
• Achieving effective anesthesia for endodontic treatment
• Management of anxiety and pain
• Preparation for endodontic treatment
• The operating microscope and its uses in endodontics
• Current principles of endodontic access
• Canal length determination including electronic apex locators
• Root canal debridement and shaping
• Nickel-Titanium rotary instrumentation
• Intracanal medication
• Procedural errors and their prevention
• Root canal obturation
• Post-endodontic restoration
• Endodontic retreatment
• Root resorptions
• Clinical applications of MTA
• Endodontic-periodontal interrelationship
• Endodontic considerations of traumatized teeth

Upon completion of this course you will be able to:

• Enhance your knowledge of the clinical and biological concepts of modern endodontics
• Successfully treat simple-rooted and multi-rooted teeth
• Apply system-based approaches and state-of-the-art technology for treating your endodontic cases
• Use endodontic hand and rotary instruments safety and effectively
• Understand the indications and apply appropriate techniques for endodontic retreatment
• Approach your endodontic cases with confidence and enjoy more predictable results
• Know when and what to refer
