Advanced Soft Tissue and Bone Grafting with Cadaver Workshop

Lecture, Cadaver Workshop and Live Surgery Course
Herman Ostrow School of Dentistry of USC
Friday - Sunday, June 2 - 4, 2017
8:00 am - 5:00 pm
Registration available at dentalcontinuingeducation.usc.edu

Registration Form

FIRST NAME ________________________
MIDDLE NAME _______________________
LAST NAME ________________________
TITLE _____________________________
SPECIALTY _________________________
DL# _________________________________
ADDRESS ___________________________
CITY ________________________ STATE ___ ZIP ____________
PHONE ( ___ ) ___________ FAX ( ___ ) __________

CARD NUMBER ________________________
EXPIRATION DATE ______________________
TOTAL PAYMENT $ ____________________
MEAL PREFERENCE: □ VEGETARIAN □ NO PREFERENCE
HOW DID YOU HEAR ABOUT THIS COURSE? _________________

WOULD YOU BE INTERESTED IN THIS COURSE AS A WEBINAR? □ YES □ NO

4 Hours of Continuing Education

Registration Fees
Before May 15, 2017
Dentist: $2,995
Auxiliary: $2,545

After May 15, 2017
Dentist: $3,295
Auxiliary: $2,800

Fees include course material, continental breakfast, lunch, and refreshments during breaks.

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

LEARNING IMPLANT DENTISTRY FOR THE RESTORATIVE DENTIST: PART II
Saturday, April 1, 2017

PERIODONTAL AND IMPLANT DECISION MAKING: FROM TREATING THE AILING TOOTH TO THE FAILING IMPLANT
Friday, April 7, 2017

ESTHETIC FULL-MOUTH IMPLANT RECONSTRUCTION: FROM TREATMENT PLANNING TO FIXED RESTORATION
Module I - Lecture: Friday, April 21, 2017
Module II - Lecture: Saturday, April 22, 2017
Module III - Workshop: Sunday, April 23, 2017

BASIC PROTOCOLS IN BONE AND SOFT TISSUE GRAFTING IN IMPLANT THERAPY
Friday - Sunday, April 28 - 30, 2017

THE REWARDS AND CHALLENGES OF COMMUNITY-BASED ORAL HEALTH PROGRAMS (WEBINAR AVAILABLE)
Friday, April 28, 2017

COMPREHENSIVE PERIODONTAL SURGERY: ESTHETIC AND FUNCTIONAL PROCEDURES FOR THE GENERAL PRACTITIONER
Friday - Sunday, May 5 - 7, 2017

MINIMALLY INVASIVE ADHESIVE AND ESTHETIC DENTISTRY: A REVIEW OF AVAILABLE TREATMENT OPTIONS & MATERIALS
Friday, May 19, 2017

COMPLICATIONS OF IMPLANT THERAPY
Saturday - Sunday, June 10 - 11, 2017

ADVANCED RESTORATIVE OPTIONS WITH DENTAL IMPLANTS FOR FULLY EDENTULOUS ARCHES
Part I - Lecture: Friday, June 16, 2017
Part II - Lecture, Demonstration, and Hands-On: Saturday, June 17, 2017

SUTURING TECHNIQUES: A PRACTICAL HANDS-ON COURSE ON SOFT-TISSUE SUTURING
Saturday, June 24, 2017

3 + 1 Free CE Program
The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2017 and receive another course for FREE.

ADVANCED SOFT TISSUE AND BONE GRAFTING WITH CADAVER WORKSHOP

Herman Ostrow School of Dentistry of USC
Friday - Sunday, June 2 - 4, 2017
8:00 am - 5:00 pm

Life-Long Tradition and Excellence ★
Speakers

Homayoun H. Zadeh, DDS, PhD (Course Director)
Dr. Zadeh is Associate Professor and Director of the post-doctoral periodontology program at the University of Southern California and a Diplomate of the American Board of Periodontology. Dr. Zadeh directs the Laboratory for Immunoregulation and Tissue Engineering (LITE) at USC, dedicated to studying basic mechanisms to regulate bone and tissue regeneration/destruction under health/disease states, as well as conducting clinical trials of dental implant outcomes. His clinical research interests involve studies on minimally-invasive surgery and tissue engineering. He maintains a part-time private practice limited to Periodontology and Implants in Southern California.

Stephen Wallace, DDS
Dr. Wallace is a graduate of Boston University School of Graduate Dentistry with a certificate in Periodontics. He is Associate Professor at the New York University Department of Implant Dentistry and a Diplomate of the International Congress of Oral Implantology and a Fellow of the Academy of Osseointegration. He lectures in the United States and abroad on dental implantology and periodontics. He is the author of journal articles and textbook chapters on implantology and co-editor of sinus elevation textbook released in Italy. Dr. Wallace maintains a private practice limited to Periodontics in Waterbury, CT.

Neema Bakhshalian, DDS, MS, PhD
Dr. Neema Bakhshalian is specialized in Periodontology and Implant Dentistry. He earned his DDS degree in 2005, and subsequently earned his PhD degree from the Florida State University with a focus on Bone Biology. With his background in tissue engineering, he started his residency program in Periodontology and Implant Dentistry at the University of Southern California in 2011. In 2015, he became a diplomate of the American Board of Periodontology. Dr. Bakhshalian is a member of several professional organizations such as the American Dental Association, American Academy of Periodontology, and Academy of Osseointegration. He is currently conducting research full time at the University of Southern California while maintaining an evidence-based state-of-the-art practice.

Topics to be discussed:
- Lateral and crestal sinus augmentation
- Piezosurgery techniques
- Horizontal ridge augmentation
  - Autogenous bone harvesting
- Vertical ridge augmentation
- Guided bone regeneration (GBR)
- Leukocyte Platelet Rich Fibrin (L-PRF)
- Onlay block grafts: rationale and techniques

Hands-on model and cadaver workshop:
- Lateral window and crestal osteotomy sinus augmentation
- Donor graft harvesting from ramus and symphysis
- Block graft fixation
- Flap and tunnel access design
- Soft tissue augmentation around implants (VISTA)
- Ridge preservation and augmentation

This course is recommended for:
- Dentists with intermediate to advanced surgical experience.

Synopsis

The success of dental implants depends on their placement in bone of adequate density and volume in order to achieve primary stability. However, usually there is at least some degree of atrophy in most implant sites due to postextraction remodeling or because of pathologic conditions. There has been a gradual shift in paradigm from merely achieving successful osseointegration to achieving final restorative outcomes that mimic natural dentition and the surrounding oral tissues. These objectives have been materialized by advancements in surgical techniques, as well as availability of biomaterials to enable predictable regeneration of oral hard and soft tissues. This course consists of two modules. The first module consists of two and half days of lecture, hands-on model workshop and live surgery. The second module is a half-day cadaver workshop.

Hands-on model and cadaver workshop:
- Lateral and crestal sinus augmentation
- Piezosurgery techniques
- Guided bone regeneration (GBR)
- Autogenous rotary bone harvesting (RBH)
- Osseodensification

Live surgery demonstration:
- Lateral window sinus augmentation
- Guided bone regeneration (GBR)
- VISTA for soft tissue augmentation

“Dr. Zadeh is a gifted clinician and instructor and he goes out of his way to make sure you understand and learn the material. A wonderful course I highly recommend.”
- Daniel Garcia, Downey, CA

“This course met my objectives of being able to do better bone/soft-tissue grafting using the best techniques.”
- Stan Covington, Mesa, AZ
