3 + 1 Free CE Program
The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2016 and receive another course for FREE.
Molar endodontics often present challenges to the clinician. These may include difficulty in isolation and access, negotiation of curved and narrow root canals, calcified canals, difficulty in canal obturation, and managing anatomical variations. However, today many advances in technology, materials and equipment have made it possible to efficiently perform successful molar endodontic treatment with more precision and predictable results.

This two-day intensive course includes lectures and hands-on workshops and is specially designed for General Dentists who wish to advance their clinical skills when performing molar endodontics. Participants will learn how to perform efficient endodontic access, clean and shape the root canal system and finally obturate in a predictable manner. Participants will also perform endodontic treatment from start to finish in real maxillary and mandibular molar teeth. Without a doubt, this course will help you master molar endodontics.

Upon Completion of the Course Participants Should Be Able To:
- Enhance knowledge of clinical concepts of molar endodontics
- Successfully treat both upper and lower molar teeth
- Apply system-based approaches when treating endodontic cases
- Approach molar endodontic cases with more confidence and enjoy more predictable results
- Know when and what to refer

Limited Time Offer!
Participants will be entered in a special raffle to win a copy of the world renowned textbook, Ingle's Endodontics - 6th Edition, a $150 value! Winner will be chosen in a random drawing at the first day of the course.
