36th Annual USC International Periodontal and Implant Symposium

Symposium Theme
Cutting Edge VS Evidence Based

Wilshire Grand Los Angeles
General Sessions: Friday - Saturday, January 28 - 29, 2011
Dental Hygiene Forum: Saturday, January 29, 2011

Herman Ostrow School of Dentistry of USC
Hands-On & Cadaver Workshop I: Thursday, January 27, 2011

Wilshire Grand Los Angeles
Los Angeles
Dear colleagues and friends:

We are pleased to invite you to attend the 36th International Periodontal & Implant Symposium. The theme of this year’s symposium will be: cutting-edge versus evidence-based. In recent years, a variety of new materials, techniques and protocols have been developed for periodontal and implant therapy. As with many novelties, there is always a great deal of excitement associated with new innovations. Clinicians are faced with balancing between selecting the most up-to-date material and techniques that benefit their patients, versus selecting the safest and most effective therapeutics. While some of the new material and protocols are quite promising, not all have been rigorously evaluated. There are numerous examples of where the early adopters of new materials and techniques have been lured by the promise of improved outcomes, but have encountered unexpected results. Therefore, a prudent approach is to embrace technological advances that have documented therapeutic improvements, while awaiting more supportive evidence prior to incorporating other newly introduced materials and protocols. A panel of internationally renowned experts will take a critical look and discuss the latest innovations in periodontal and implant therapy and make recommendations for present and future therapy. The program boasts of four days with a diverse range of educational opportunities. These include two all-day programs with hands-on workshops on models and cadavers. There is also a full-day program dedicated to dental hygienists. Although the majority of the general-session presentations are interdisciplinary in nature, there are also sessions designated as “Surgical Track” and “Restorative Track” that focus on specific disciplines. This is an educational opportunity not to be missed by the entire oral healthcare team, including surgical specialists, restorative dentists, dental hygienists and dental technologists.

We hope to see you all in Los Angeles in January 2011.
# Program-At-A-Glance

## Hands-On Cadaver Workshop (Thursday, January 27, 2011 - Herman Ostrow School of Dentistry of USC)

<table>

Speakers

Daniel Buser, D.M.D., Prof. of Med. Dent. (SWITZERLAND) (Keynote Web Presentation)
Dr. Buser is Professor and Chairman at the Department at Oral Surgery and Stomatology and Executive Chairman of the School of Dental Medicine at University of Bern in Switzerland. He is Past President of various academic associations, the European Association for Osseointegration, the Swiss Society of Oral Implantology and the Swiss Society of Oral Surgery and Stomatology. Dr. Buser is also member of the Board of Directors and President-elect of the ITI (International Team for Implantology), the Board of Directors of the Osteology Foundation, and is President of the Swiss Implant Foundation (2007-present). He received several scientific awards and has authored and co-authored more than 200 publications.

Leo and Sydelle Ward Foundation Endowed Keynote Lectureship
Topic: Early implant placement in post-extraction site in the esthetic zone: A well documented treatment option offering successful outcomes with high predictability and low risk of complications

Tara Aghaloo, DDS, PHD (USA)
Dr. Aghaloo is Associate Professor of Oral and Maxillofacial Surgery at the UCLA School of Dentistry. She completed her dental training at UMKC, and OMS residency at UCLA. Subsequently, she completed a Ph.D. in oral biology at UCLA. Her clinical practice focuses on hard and soft tissue augmentation and dental implants. Dr. Aghaloo has published extensively in bone biology with an emphasis on bone grafting to improve current practices and dental implant success. She is also active in professional organizations such as AO, AAOMS, and IADR. She was recently Chair of the stem cell group for the AO’s Silver Anniversary Summit: Impact of Biological and Technological Advances on Implant Dentistry, and is the program chair for the upcoming 2011 annual AO meeting in Washington DC.

Topic: BMP-2 and other growth factors for craniofacial reconstruction

Carlos Dos Reis P De Araujo, DDS, MS (BRAZIL)
Dr. Araujo is currently Assistant Professor in the Department of Prosthodontics, University of São Paulo School of Dentistry in Bauru. He is a graduate of University of São Paulo in Brazil and has earned a master degree. He is the Coordinator of the Esthetics Master Program at the University of São Paulo. Dr. Araujo has authored several articles and book chapters in Portuguese and international journals. He maintains private practice in implants and prosthodontics in Bauru, Brazil.

Topic: A new paradigm for implant aesthetics: The Cone Morse Design

Michael Block, DMD (USA)
Dr. Block graduated from the University of Rochester in 1975, attaining both a BA in Biology and a BS in Biomedical Engineering. He completed his dental training at the Harvard School of Dental Medicine in 1979, receiving his D.M.D. cum laude. He completed his residency program in Oral and Maxillofacial Surgery at the LSU School of Dentistry. He remained at the LSU School of Dentistry and achieved the academic rank of Professor in the Department of Oral and Maxillofacial Surgery. Currently he is in private practice dedicated to patient oriented care. Dr. Block is the editor-in-chief of four textbooks on dental implants. He is Past President of the Academy of Osseointegration, and has been program chairman for three of their annual programs. He serves on the American Association of Oral and Maxillofacial Surgeons (AAOMS) Committee on Continuing Education. Dr. Block has been an examiner for the American Board of Oral and Maxillofacial Surgery. He is a Section Editor on Dental Implants for the Journal of Oral and Maxillofacial Surgery.

Topic: Management of the facial gingival margin: Full arch immediate provisional restorations - A to Z

Chris H. Chang, DDS., PhD (TAIWAN)
Dr. Chang received his PhD degree in bone physiology and Certificate in Orthodontics from Indiana University in 1996. Dr. Chang is a highly-respected private practitioner in Taiwan. In addition, he is frequently invited to give lectures worldwide on a wide range of topics, including the Damon system, OrthoBoneScrews, excellent finishing, clinic management and effective presentations. As a publisher of News & Trends in Orthodontics, he has been actively involved in the design and application of orthodontic bone screws. His most recent focus of practice is to apply orthodontic bone screws to the treatment of the impacted cuspids.

Topic: The orthodontic and implant connection: From orthodontic bone screw to dental implant
Speakers

Casey Chen, BDS, PhD, DDS (USA)
Dr. Chen is Professor and Chair of the Division of Periodontology, Diagnostic Sciences & Dental Hygiene at the Herman Ostrow School of Dentistry of USC. He graduated from the National Taiwan University with a degree of BDS, obtained a certificate in Periodontology from the University of Pittsburgh, a Ph.D. in Oral Biology from the State University of New York at Buffalo, and a dental degree from Loma Linda University. He has more than 60 publications in peer-reviewed journals, and is a past member of the editorial board of the Journal of Dental Research. Dr. Chen also serves as reviewer of NIH and journals in microbiology, dentistry and infectious diseases. Dr. Chen maintains a private practice limited to periodontics in Irvine, California.
Topic: Microbiological and clinical assessment and management of periodontal and peri-implant diseases

Gerard Chiche, DDS (USA)
Dr. Chiche is the Thomas P. Hinman Endowed Chair in Restorative Dentistry, and the Director of the Center for Esthetic & Implant Dentistry at MCG School of Dentistry in Augusta, GA. He has lectured nationally and internationally and holds membership in the American College of Dentists, the American Academy of Esthetic Dentistry, the American Academy of Fixed Prosthodontics, the American Academy of Restorative Dentistry and the Omicron Kappa Upsilon Dental Honor Society. He is a Past President of the American Academy of Esthetic Dentistry and authored several textbooks.
Topic: A review of esthetic and occlusal restorative failures

George C. Cho, DDS, FACP (USA)
Associate Professor in the Division of Restorative Sciences, Co-Director of the Advanced Education in Prosthodontics and Director of Predoctoral Implant Dentistry at the Herman Ostrow School of Dentistry of USC. Dr. Cho received his dental degree in 1987 and graduated from the Advanced Education in Prosthodontics Program in 1990 from Ostrow School of Dentistry, and has been since a full time faculty member. Dr. Cho is also a fellow of the American Board of Prosthodontics, member of the American Academy of Restorative Dentistry, ADA, CDA, and Western Los Angeles Dental Society. He maintains a private practice limited to Prosthodontics in Torrance, California.
Topic: Optimum implant gingival esthetics; with or without cad/cam?

Lee Culp, CDT (USA)
Mr. Culp is the Chief Technology Officer, CTO for DTI Dental and the editor-in-chief of Teamwork. He is the 2007 recipient of the Kenneth Rudd Award from the American Society of Prosthodontics, the 2007 recipient of the AADC Presidents Award for Excellence in Dental Education, as well as the 2003 recipient of the National Association of Dental Laboratories Excellence in Education Award. Mr. Culp is also adjunct professor at University of North Carolina– School of Dentistry, Graduate Prosthetics department. He is an avid writer and has been a contributor to four dental textbooks.
Topic: Digital dentistry: Beyond imagination

Sascha A. Jovanovic, DDS, MS (USA)
Dr. Jovanovic has been formally trained in Periodontics at UCLA School of Dentistry, in Implant Dentistry at Loma Linda University and in Prosthodontics at the University of Aachen, Germany. He holds a Master of Sciences degree in Oral Biology from UCLA. He specializes in dental implant therapy, is a lecturer at UCLA and is the Academic Chair of gIDE Education Institute. Dr. Jovanovic is past-president of the European Association for Osseointegration (EAO) and a past-board member of the Osseointegration Foundation (OF). He teaches worldwide and has published over 60 articles and textbook chapters.
Topic: General Sessions: Optimal soft tissue management around implants
Hands-On Cadaver Workshop II: Optimal implant placement and bone and soft tissue grafting

Edward Lynch, BDentSc, MA, PhD (UNITED KINGDOM)
Professor Lynch is the Head of Dental Education and Research at Warwick University. He has been elected the most influential person in UK Dentistry in April 2010 by his peers and has held the position of Professor of Restorative Dentistry and Gerodontology of the Queen’s University Belfast, as well as Consultant in Restorative Dentistry to the Royal Hospitals. Prof. Lynch has been awarded 94 research grants, and has more than 500 publications. He is a Consultant to the ADA, a spokesperson for the BDA, a Scientific board member of the International Health Care Foundation and ISBOR. Prof. Lynch is on the editorial board of numerous International Journals and will be the incoming President of GÖRG.
Topic: Rationale for the use of ozonated water instead of water in ultrasonic periodontal therapy
Speakers

Bradley S. McAllister, DDS, PhD (USA)
Since completing his periodontal specialty training and PhD in San Antonio Texas during 1993, Dr. McAllister has practiced the specialty of Periodontics in the Portland area. He is both a board certified diplomate of the American Board of Periodontology and of the International Congress of Oral Implantology. Dr. McAllister has been active in treating the periodontal diseases with an emphasis on dental implant placement. He has over twenty years of experience in the surgical placement of dental implants and bone reconstruction. Dr. McAllister was a full time faculty member at the Oregon Health Sciences University, and the director of the dental implant program for the residents and performed extensive research related to bone grafting for implant reconstruction. He is currently a part time faculty member at the Oregon Health Sciences University. Dr. McAllister has published extensively and lectures both nationally and abroad.
Topic: Cellular allograft bone augmentation strategies: Evidence for use

Lynn D. Terracciano-Mortilla, RDH (USA)
Ms. Mortilla is a graduate of the dental hygiene program at the State University of New York at Farmingdale. She has been involved with the International Congress of Oral Implantologists for 15 years and is the Executive Director of their auxiliary section, the ADIA (Association of Dental Implant Auxiliaries). Lynn has focused her work with the ADIA on world wide implant education for auxiliaries via certification programs. She has achieved the designation of fellow in the ADIA, their highest recognition and is a member of ICOI’s Board of Directors. In addition to being a practicing hygienist, Lynn is an adjunct clinical instructor at Temple University Department of Periodontics and Implants and is a member of the implant preceptorship educational faculty at The University of Texas Health Science Center in San Antonio. Lynn lectures and publishes internationally on dental implants, maintenance concerns and office procedures relating to dental implants.
Topic: Advanced concepts in risk assessment, evaluation & care of dental Implants

Ilan Rotstein, DDS (USA)
Dr. Rotstein is Professor and Chair of the Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics and Associate Dean of Continuing Education at the Ostrow School of Dentistry of USC. He has been Chair of the Research Committee of the International Federation of Endodontic Associations (1995 - 2010) and past member of the Research and Scientific Affairs Committee of the American Association of Endodontists. Dr. Rotstein published more than 100 papers and textbook chapters in the dental literature and has lectured extensively nationally and internationally in more than 20 countries.
Topic: The endo-perio continuum

Avishai Sadan, DMD (USA)
Dr. Sadan is Dean, Herman Ostrow School of Dentistry of USC. He is the former editor-in-chief of Quintessence International, the former editor-in-chief of Quintessence of Dental Technology (QDT), served on the editorial boards of other journals, and has lectured and published nationally and internationally on esthetic and implant dentistry and biomaterials. He received his training in prosthodontics from the LSU School of Dentistry and has also completed a fellowship in prosthodontics emphasizing esthetic and implant dentistry at LSU. A member of several professional organizations including the American College of Prosthodontists, the Academy of Osseointegration, the European Academy of Esthetic Dentistry, the American College of Dentists, and other organizations, he maintains an intramural practice limited to fixed and implant prosthodontics.
Topic: Failures and complications in Fixed Prosthodontics and Implant Dentistry- Lesson learned

Nigel A. Saynor, BDS Vu (Manc) M Dent Sc (UNITED KINGDOM)
Dr. Saynor qualified in 1980 with distinction from Manchester University Dental Hospital. The following year was spent at Manchester Dental Hospital and the Manchester Royal Infirmary, involved with oral surgery and special needs patients. He is currently the clinical director of a specialist dental centre in South Manchester, taking referrals for Implant Dentistry, Endodontics, and Periodontics. He graduated by examination with a MSc in Implantology in 2008 from the University of Manchester. He is Past President of the British Academy of Aesthetic Dentistry, an active member of the American Academy of Osseointegration, member of the Association of Dental Implantology, and Branch Chairman of the South Manchester British Dental Association. He is an Honorary Clinical Tutor at the University of Manchester Dental School on the Masters programme in Dental Implantology since 2007. He has published in several UK journals on aesthetic aspects of Implant dentistry, and lectures extensively all over the world.
Topic: Anterior implants 4 ultimate aesthetics
Speakers

Clark M. Stanford, DDS, PhD (USA)
Centennial Fund Professor in the Dows Institute for Dental Research and in the Department of Prosthodontics, and Associate Dean of Research at University of Iowa. Dr. Stanford received his BS, DDS, Certificate in Prosthodontics and PhD in Cell Biology from the University of Iowa. He is a member of several professional organizations and serves on their governing board and committees. He is a Fellow in the Academy of Prosthodontics. His research activities include bone and connective tissue responses to mechanical stimuli, bone mineralization and clinical studies evaluating material outcomes. Dr. Stanford maintains a clinical prosthodontic practice within the College of Dentistry.
Topic: Integrating predictable esthetics into clinical practice

Masana Suzuki, DDS (JAPAN)
Dr. Suzuki received his DDS degree from Nippon University. He is an active member of the Japan Periodontal Association, an instructor of the Japan Clinical Periodontology Association, President of the Society of Japan Clinical Dentistry (SJCD) Tokyo, and an active member of the Osseointegration study club of Japan. Dr. Suzuki has published extensively on periodontal plastic surgical and Microsurgical procedures. He maintains a full-time private practice in Tokyo, Japan.
Topic: Soft tissue augmentation around implants in the aesthetic zone

Senichi Suzuki, DDS, PhD (JAPAN)
Graduated from the School of Dentistry at Matsuo, Nihon University in 1984. He is President of Lion implant center group, Clinical Professor of Nihon University school of dentistry at Matsudo, Honorary Professor of Yantai Stomatological hospital affiliated to Binzhou medical college, and Associate professor of the International Academy for Implantology in Baden-Baden. He is also Visiting Scholar of the University of Southern California. Ambassador of ICOI AP Section Japan, Vice President of ICOI AP Section Japan Board, and President of the Dental Educational Department of Japan Society of Health Science. Dr. Suzuki is President of International society of osseointegration in Japan and Editor of Implant dentistry (ICOI).
Topic: The maintainance of crestal bone around implants placed into extraction sockets: Is it a predictable protocol for the immediately loaded full-arch prostheses?

Pascal Valentini, DDS (FRANCE)
Dr. Valentini received his DDS from the University of Paris in 1982. He is Director of the European Post Graduate Program of Oral Implantology at the University of Corsica (France), Adjunct Associate Professor of Implant Dentistry at the University of Loma Linda (USA), Visiting Professor at the University of Liege (Belgium), and Board member of the European Association for Osseointegration. He mainains a private practice limited to oral and implant surgery in Paris (France).
Topic: General Sessions: Timing of implant placement after tooth extraction
Hands-On Cadaver Workshop I: Maxillary sinus grafting - The right technique

Homayoun H. Zadeh, DDS, PhD (USA) (Symposium Chair)
Associate Professor, Herman Ostrow School of Dentistry of USC. Dr. Zadeh is a graduate of the Ostrow School of Dentistry. He completed the advanced clinical education in Periodontology and earned his PhD degree in Immunology from the University of Connecticut. He is a Diplomat of the American Board of Periodontology. He serves as the editorial reviewer for several scientific journals. Dr. Zadeh also leads a research team, funded by the NIH and industry. His clinical research interests involve studies on minimally-invasive surgery and tissue engineering. He is Director of the USC International Periodontal and Implant Symposium and maintains a part-time private practice limited to Periodontology and Implants in Southern California.
**Workshops**

**Hands-On Cadaver Workshop I**

**January 27, 2011 - Ostrow School of Dentistry of USC**

*Maxillary sinus grafting - The right technique*

Speaker: Dr. Pascal Valentini

Upon completion of this course participants will know:

- Anatomy and physiology of maxillary sinus
- Management of relative contra indications
- Surgical technique for sinus grafting: step-by-step
- Long term results of implants in posterior maxilla
- Complications associated with maxillary sinus grafting: Management and prevention

**Hands-On Cadaver Workshop II**

**January 30, 2011 - Ostrow School of Dentistry of USC**

*Optimal implant placement and bone and soft tissue grafting*

Speaker: Dr. Sascha Jovanovic

Upon completion of this course participants will know:

- The steps for hard and soft tissue grafting to achieve an esthetic implant site
- Appropriate grafting and membrane materials for ridge augmentation
- How to select the appropriate implant type to support the peri-implant tissues
- Management of the soft tissues atraumatically and harvest a soft tissue graft with optimal outcome

The two workshops will include theoretical lecture in the morning, followed by hands-on workshop on cadaver in the afternoon.

**General Information**

**EVENT LOCATION**

*Wilshire Grand Los Angeles*

930 Wilshire Blvd., Los Angeles, CA 90017

- Right in the heart of downtown Los Angeles
- 25 minutes from Los Angeles International Airport
- Minutes away from CA-110, I-10, I-101, and I-5.

Telephone: 213-688-7777

Reservation: 888-773-2888 (Group Code 0111USCPER)

Website: www.wilshiregrand.com

**QUESTIONS?**

Please contact Herman Ostrow School of Dentistry of USC Office of Continuing Education by one of the following methods:
