Mastering Bone Grafting for Implant Placement

Bach Le, DDS, MD, FICD
Assistant Professor, Division of Surgical Therapeutic and Bioengineering Sciences and Assistant Director, Oral and Maxillofacial Surgery, USC School of Dentistry and USC Medical Center. Dr. Le is a Diplomate of the American Association of Oral & Maxillofacial Surgeons, the American Dental Society of Anesthesiologists, and the International Congress of Oral Implantologists. He holds Fellowship in the International College of Dentists and the International Association of Oral & Maxillofacial Surgeons. Dr. Le maintains a private practice in Whittier, California.

David A. Hochwald, DDS
Clinical Professor at the USC School of Dentistry where he was the Past Director of Undergraduate Oral and Maxillofacial Surgery and is currently Co-Director of the USC Graduate Implant Surgery Program. Dr. Hochwald is a Diplomate of the American Board of Oral and Maxillofacial Surgery. He is a Fellow in the American Association of Oral and Maxillofacial Surgeons, a Fellow in the Academy of Dentistry International, and a Fellow in the International College of Dentists. Dr. Hochwald has extensive experience in preprosthetic and implant surgery, which has been his focus of interest in practice. He is currently in private practice in Bellflower and Huntington Beach, California.

Synopsis:
This advanced bone graft course will feature scientific lectures and a hands-on workshop. The course will focus on the most current techniques in bone grafting to improve long-term clinical success with dental implants. This course will enable you, the clinician, to broaden your knowledge and scope of practice and improve surgical skill and implant expertise.

Upon completion of this course you will be able to:

- Understand bone biology and graft healing
- Perform alveolar ridge augmentation techniques
  - Maxillary grafting
  - Mandibular grafting
  - Vertical and horizontal alveolar onlay grafting
  - Ridge split technique/expansion technique
  - Flap designs
- Perform maxillary sinus grafting
  - Caldwell-Luc approach
  - Osteotome technique
- Compare various graft materials
- Harvest ramus and chin grafts
- Perform atraumatic and flapless tooth removal
  - Techniques for socket preservation
  - Immediate implant placement techniques
- Recognize and treat graft complications

Join us as we set sail from Los Angeles, California, aboard the beautiful Vision of the Seas, for 7 wonderful days in the Mexican Riviera and an outstanding Continuing Education program with our distinguished speakers. Enjoy discovering a colonial city, snorkeling in the Sea of Cortez, exploring the legendary Sierra Madre or relishing the simple pleasure of a siesta on a white-sand beach: the choice is yours!
