Endodontics has gone through many exciting changes in the past several years. Recent advances in technology, materials and equipment have changed the way endodontics is practiced today. These advances have made it possible to efficiently perform successful endodontic treatment with improved precision, predictable results, and with much greater patient acceptance.

This comprehensive state-of-the-art course includes series of seminars and hands-on workshops specially designed for General Dentists who wish to advance their knowledge and clinical skills in the art and science of endodontics. A team of endodontic specialists from USC School of Dentistry will thoroughly discuss evidence-based clinical and biological concepts of modern endodontic therapy. These experts will walk you, from start to finish, through all the necessary steps and phases that will enable you to enhance the way you practice endodontics so you can provide the best standards of endodontic care to your patients. During the hands-on part of this course you will have the opportunity to apply the principles discussed by the USC team of experts and practice in our famous “Sim-Lab”, one of the most modern and realistic simulator facilities in California. You will perform endodontic treatment from start to finish in both single-rooted and multi-rooted teeth and will practice endodontic retreatment. Without doubt, this course will be a complete learning experience!

Ilan Rotstein, DDS (Course Director)
Associate Professor and Chair, Division of Surgical, Therapeutic and Bioengineering Sciences and Associate Dean for Continuing Oral Health Professional Education at the USC School of Dentistry. Dr. Rotstein has published extensively in the endodontic literature.

Samuel Oglesby, DDS (Clinic Director)
Associate Professor of Clinical Endodontics, Director of the Endodontic Clinics and Director of Predoctoral Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the University of Southern California School of Dentistry.

Samir Batniji, DDS, MS, Ed
Associate Professor of Clinical Endodontics at the University of Southern California School of Dentistry Los Angeles, California. Dr. Batniji maintains private practices in Diamond Bar, San Dimas, Rancho Cucamonga and Fullerton, California.

George Bogen, DDS
Associate Professor of Clinical Endodontics and Assistant Director of Undergraduate Emerging Endodontic Care 1995 - 1998 at the USC School of Dentistry. Dr. Bogen maintains a private Endodontic practice in Los Angeles.

Jack Brown, DDS, MS
Associate Professor of Clinical Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry Los Angeles, California. Dr. Brown maintains a private practice in Beverly Hills, California.

David Jaramillo, DDS, EE
Assistant Professor of Clinical Endodontics at the USC School of Dentistry and Loma Linda University School of Dentistry. Dr. Jaramillo is former Professor of Dental Pain and former Head of the Department of Endodontics at the Universidad Latina de Mexico.

Keith Komatsu, DDS
Assistant Professor of Clinical Endodontics, Division of Surgical, Therapeutic and Bioengineering Sciences at the USC School of Dentistry Los Angeles, California. Dr. Komatsu also maintains a private endodontic practice in Redondo Beach, California.

Stanley Malamed, DDS

James Simon, BA, DDS
Professor and Director of Advanced Endodontics at the USC School of Dentistry. Formerly Director of the Endodontic Residency at the VA Medical Center, Long Beach. Dr. Simon has published extensively in the endodontic literature.

REGISTRATION FEES

Before May 15, 2005
Dentist: $2,450

After May 15, 2005
Dentist: $2,550

Limited Attendance
*Attendance fee will be included as resident to enhance faculty in participant role.
ENDODONTICS FROM A TO Z: A HANDS-ON WORKSHOP FOR THE GENERAL PRACTITIONER
USC School of Dentistry
Friday - Sunday • 9:30 a.m. - 5:00 p.m.
June 3 - 5, 2005 • June 17 - 19, 2005
Online registration at www.uscidentalce.org

Topics to be covered:
• Diagnosis and treatment planning
• Case selection in endodontics
• Endodontic emergencies
• Achieving effective anesthesia for endodontic treatment
• Management of anxiety and pain in endodontics
• Preparation for endodontic treatment
• The operating microscope and its uses in endodontics
• Current principles of endodontic access
• Canal length determination including electronic apex locators
• Root canal cleansing and shaping
• Nickel titanium rotary instrumentation
• Intracanal medication
• Procedural errors and their prevention
• Root canal obturation
• Post-endodontic restoration
• Endodontic retreatment
• Root resorptions
• Clinical applications of MTA
• Endodontic-periodontal interrelationships
• Restoration of endodontically treated teeth

Upon completion of this course you will be able to:
• Enhance your knowledge of the clinical and biological concepts of modern endodontics
• Successfully treat single-rooted and multi-rooted teeth
• Apply system-based approaches and state-of-the-art technology for treating your endodontic cases
• Use endodontic hand and rotary instrumentation safely and effectively
• Understand the indications and apply appropriate techniques for endodontic retreatment
• Approach your endodontic cases with confidence and enjoy more predictable results
• Know when and what to refer
