Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition fee will be refunded if cancellation occurs within 14 days before this course. No refund is granted afterwards. A $50 fee is withheld for processing. For additional registrations, xerox this form and send.

USC School of Dentistry is an ADA CERP, CDA and AGD recognized provider.
Dear colleagues:

The anterior maxilla is often referred to as the "esthetic zone". Tooth replacement in the esthetic zone presents unique challenges for the clinician. Yet, achievement of optimal esthetics in this area can be most rewarding. The prerequisites of achieving a successful esthetic outcome in this region include: 1) knowledge of the biology of the implant-prosthetic-soft tissue interface and their post-implant alterations; 2) careful preoperative treatment planning; 3) augmentation of hard and soft tissues when deficiencies exist; 4) attention to detail in execution of surgical and prosthetic procedures. This course will review the biological fundamentals, as well as the clinical surgical and restorative techniques involved. The format of this course includes lecture, hands-on workshop, as well as live surgery demonstration. Lecture presentations are evidence-based in nature, and include clinical cases to illustrate the principles discussed. The small group setting in the state of the art facility of the University of Southern California will provide course participants with a unique educational opportunity.

Sascha A. Jovanovic, D.D.S., M.S.
Dr. Jovanovic is formally trained in periodontics at UCLA School of Dentistry, in Implant Dentistry at Loma Linda University, and in Surgery at University of Aarhus, Denmark and holds a Masters of Science degree in Oral and Maxillofacial Surgery from UCLA. He is a past president of the European Association for Osseointegration (IAO) and a past-board member of the American Academy of Periodontology. Dr. Jovanovic has been awarded the 2000 annual scientific congress, recipient of the young investigator fellowship of the American Academy of Periodontology, of the Implantology award of the California Society of Periodontists and of the German Implant Society Research award. Dr. Jovanovic's clinical research emphasizes bone regeneration of implant defects, including ridge preservation and augmentation around implants, esthetic implant designs and osseointegration in the esthetic zone.

Michel Magne, C.D.T.
Michel Magne graduated in Neuchâtel as a dental technician (CDT) in 1979. He continued developing his technical and clinical skills at Saint Louis University in St. Louis, Missouri and at the University of Southern California School of Dentistry. After completing his masters, he was recruited as a member of the restorative dentistry faculty and became an active member of the private practice at UCLA Implant Dentistry. Dr. Magne is clinical assistant professor of Advanced Prosthetics at University of Southern California School of Dentistry.

Peter K. Moy, D.M.D.
Dr. Moy received his dental degree from the University of Pittsburgh, a certificate in General Practice Residency from Queen's Medical Center in Honolulu, Hawaii and his Certificate in Oral and Maxillofacial Surgery from UCLA School of Dentistry. He is a Diplomate of the American Board of Oral and Maxillofacial Surgery, as well as Hospital Dentist at UCLA. He is also the Co-Director of the UCLA Dental Implant Center. Dr. Moy has numerous articles related to implant Dentistry and Osseointegration, specifically, on bone grafting and augmentations for the atrophic ridges. He has published numerous articles and internationally, most recently at the 98th Annual Meeting of the American Association of Oral and Maxillofacial Surgery. Dr. Moy has established and maintained his private practice in the West Coast Center for Osseointegration located in Brentwood, California.

Homayoun Zadeh, D.D.S., Ph.D.
Dr. Zadeh is an Associate Professor and Chair of the Department of Periodontology at the University of Southern California School of Dentistry. He is a Diplomate of the American Board of Oral and Maxillofacial Surgery. He received his doctor of dental surgery degree from USC School of Dentistry in 1987. He has also completed advanced clinical education in Periodontology and earned a PhD degree in immunology from University of Southern California School of Medicine. Dr. Zadeh leads a research team, funded by the National Institutes of Health, investigating the mechanisms of periodontal disease. He has extensive publication track and serves as editorial reviewer for numerous periodontal and immunological journals. Dr. Zadeh's research interest is to develop novel regenerative approaches to enhance bone and periodontal tissue formation in order to address gaps existing in our understanding of periodontal regeneration.

Yoashiro Goto, D.D.S., M.S.D.
Dr. Goto is Clinical Assistant Professor of Advanced Prosthetics at the University of Southern California School of Dentistry in Los Angeles, California. Dr. Goto received his DDS degree from Showa University School of Dentistry in Tokyo, Japan, and earned a Japanese dental degree in 1993. He then joined his father's dental clinic before starting his teaching career at the University of Southern California School of Dentistry. Dr. Goto has earned his Masters Degree and Certificate of Advanced Training in Prosthodontics at the University of Washington, Seattle. Dr. Goto has published multiple articles in national and international dental journals, including a research of Naruto's dentistry.
Dear colleagues:

The anterior maxilla is often referred to as the "esthetic zone". Tooth replacement in the esthetic zone presents unique challenges for the clinician. Yet, achievement of optimal esthetics in this area can be most rewarding. The prerequisites of achieving a successful esthetic outcome in this region include: 1) knowledge of the biology of the implant-prosthetic-tissue interface and their post-treatment alterations; 2) careful preoperative treatment planning; 3) augmentation of hard and soft tissues when deficiencies exist; 4) attention to detail in execution of surgical and prosthetic procedures. SPEAKERS

Lyndon Cooper, D.D.S., Ph.D.
Cooper is the Stokkings Distinguished Professor of Dentistry within the Departments of Prosthodontics and Biochemistry & Biophysics at the University of North Carolina at Chapel Hill. He is the Editor of the Advanced Education in Prosthodontics and the Bone Biology and Implant Therapy Laboratory. Cooper, a Diplomate of the American Board of Prosthodontics, is endowed as the College of Prosthodontist's Outstanding Young Prosthodontist (1997) and serves as a member of its Board of Directors. Dr. Cooper maintains an active private practice and postgraduate education. Michel Magne has authored and co-authored numerous articles on esthetic dentistry and has lectured frequently on these topics.

Sascha A. Jovanovic, D.D.S., M.S.
Jovanovic is formally trained in periodontics at UCLA School of Dentistry, in Implant Dentistry at Loma Linda University, and in Periodontology at University of Aachen, Germany and holds a Masters of Science degree in Oral and Maxillofacial Surgery from UCLA. He is the past President of the European Association for Osseointegration (IAO) and a past-board member of the Surgical Section of the International Association of Osseointegration. He is the Editor of the 2000 annual scientific congress, recipient of the young investigator fellowship of the American Academy of Periodontology, of the Implantology award of the California Society of Periododontists and of the German Implant Society Research award. His research focuses on the South African Society Peri-Implantology. Jovanovic's clinical research emphasizes bone regeneration with drugs and tissue engineering in dental implant therapy. His applied research focuses on bone regeneration with different bone grafting materials and on the use of artificial bone regeneration in the maxilla and mandible.

Peter K. Moy, D.M.D.
Moy received his dental degree from the University of Pittsburgh, a certificate in General Practice Residency from Queen's Medical Center in Honolulu, Hawaii and his Certificate in Oral and Maxillofacial Surgery from UCLA School of Dentistry. He is in charge of a number of esthetic courses and postgraduate education. Moy has written numerous articles related to Implant therapy and bone & soft tissue reconstruction at the UCLA Continuing Dental Education and is director and owner of Oral Design Center, a dental laboratory owner and director of Oral Design Center, a dental laboratory.
